Registration > Utilities > Activate Students

Corrected the issue that caused the utility to indicate students as **No Show** instead of activating them.

Modified the utility logic so that when a student is activated after the first day of school and has special programs, the student record is updated with the first day of school set to No Show and a new row is added with the new entry date.

Registration > Utilities > TReX Export

Updated the following GreenLight naming conventions to TReX Data Standards:

- ####LastName_FirstName_descriptor
- #### = last 4 digits of the Student ID
- LastName = student's last name
- FirstName = student's first name
- Descriptor = stu (student record)
