Setup Standards-Based Conversion Tables

This page allows the user to create and maintain district-wide conversion tables to be used for Standards-Based Grading in TeacherPortal.

Grade Reporting > Maintenance > TeacherPortal Options > District > Stds-Based Conv Tbl

The screenshot displays the 'STDS-BASED CONV TBL' interface. At the top, there are navigation tabs: OPTIONS, HINT QUESTIONS, ADMINISTRATIVE USERS, **STDS-BASED CONV TBL**, STDS-BASED GRD STANDARDS, STDS-BASED CRS SETUP, and READING LEVELS. Below the tabs, there is a 'Table:' input field, a 'Retrieve' button, and a 'Print' button. The main area is divided into two panels. The left panel contains a table with columns: 'Delete' (trash icon), 'Table' (input field), 'Low-Point' (input field with '0'), and 'High-Point' (input field with '0'). Below this table is a pagination bar with 'First', '1' (selected), '/ 1', 'Last', and 'Rows: 1', along with an 'Add' button. The right panel is titled 'Conversion Table:' and contains a table with columns: 'Delete' (trash icon), 'Points' (input field with '0.0'), and 'Conversion Grade' (input field with '0.0'). There are 10 rows in this table. Below the table is a pagination bar with 'First', '1' (selected), '/ 1', 'Last', 'Rows: 10', and 'Add' and 'Add 10' buttons.
