II. Attendance Calendar

A calendar must be created for each track at the new campus.

There are two options for creating a campus calendar. You can copy an existing calendar from

another campus and track, or you can enter a new calendar from scratch.

Set attendance posting options for each track at the campus.

[Attendance > Maintenance > Campus > Campus Options](#)

This page allows you to set current year campus attendance options by track, including minutes of instruction as mandated by HB 2610. If the campus has multiple campus calendars, you must establish a separate set of attendance options for each attendance track.

Add a new track:

☐ Click **Add**.

The **Track** field is replaced by the **New Track** field.

☐ Type the new track number.

Or, click **Cancel** to return.

Valid track numbers are 00-99, and the number cannot already exist.

☐ Enter campus options and an optional description for the track as described below, and click **Save**.

Once entered, the new track number will be listed in **Track** drop-down fields throughout ASCENDER.

Update data:

- If the selected track is associated with **Instructional Program Type** 01-03, or 13-15, the heading is **Calendar Operational Minutes**.
- If the selected track is associated with **Instructional Program Type** 04-12, or blank, the heading is **Calendar Instructional Minutes**.

- Prior to the 2018-2019 school year, **Instructional Program Type** is not available. The heading is **Calendar Minutes**.

Refer to the [TEA Student Attendance Accounting Handbook \(SAAH\)](#) for assistance.

Calendar Operational Minutes:

When these values are saved, the values are used to populate the campus calendar.

NOTE: The first time you select the **Instructional Program Type** (i.e., change from blank to a valid value) the following occurs on the Campus Calendar page for Type 99 Waivers only:

- If the existing calendar waiver minutes are *more* than the new value for **Shortened Daily Minutes** entered on the Campus Options tab, the program will set the waiver minutes to the new value for **Shortened Daily Minutes**.
- If the existing calendar daily minutes are *more* than the new value for **Daily Minutes** entered on the Campus Options tab, the program will set the daily minutes to the new value for **Daily Minutes** on the Campus Options tab.

This only applies the first time **Instructional Program Type** is set. Once set, the normal edits apply.

❑ Under **Alternate Days**:

This section is used if the campus has more than one period that is used for ADA period, such as for A-Day/B-Day schedules.

For example, the A-Day schedule may take ADA attendance during period 02, and the B-Day schedule may take ADA attendance during period 05.

For both days, an additional period must be created that is the same for both A-Day and B-Day. This must be a period when no students are scheduled. For example, if the campus has classes during periods 01-08, then period 09 could be used as the extra ADA period. This “extra” period must be the same for both A-Day and B-Day. Be sure this extra period is included in the **1st Period Nbr** and **Last Period Nbr** fields.

When attendance is posted to either ADA posting period (e.g., 02 or 05), it is *also* posted to the extra period (e.g., 09).

NOTE: All tracks at the same campus must have the same “extra” ADA posting period. For example, if the campus creates period 09 as the extra period, then period 09 must be used for all tracks.

The check box is disabled because attendance has been posted on at least one date this school year for this campus-track.

A check box is not displayed if that track does not exist at the campus.

Add a campus:

If no tracks exist at the campus, a row is not initially displayed for the campus. You can add a campus and track if needed:

- ☐ Click **+Add**.

A row is added to the grid. Select the campus from the drop-down.

- ☐ Add at least one track, as described in the next section.

The campus is not saved until you copy a calendar to a track.

- ☐ To cancel adding the campus, click .

Create a new track:

If at least one track exists at the campus, a row is displayed for the campus. You can create new tracks if needed:

- ☐ Click **+Add** to add a new campus-track.

A text input field appears in place of the button, allowing you to type a new two-digit track.

NOTE: To cancel, double-click the input field, or press ESC, and the button is again displayed.

- ☐ **IMPORTANT:** After typing the track, press ENTER.

The track is added to the grid and is selected by default.

The new track is not saved until you click **Copy** with that track selected. Once saved, the new track will appear in **Track** drop-down fields across ASCENDER.

NOTE: If you added a new track to the grid by mistake, you can clear the check box in the grid. When you click **Copy**, that track will not be saved.

☐ Click **Copy**.

The **From Campus Track** calendar and options are copied to the selected tracks according to your selections. Any new tracks are created.

LEGEND:

	<u>Begin Cycle</u>
	<u>Holiday</u>
	<u>Weekend</u>
	<u>End of School</u>
	<u>Inservice</u>

The upper section is for designating Day Types, such as first and last day of school, holidays, cycle begin dates, etc.

The lower section is for adjusting school day minutes for weather days, waivers, make-up days, etc. The lower section is only enabled for saved calendars.

Day Type Selection	<p>Click a Day Type for the selected date(s). Click the description of the day, not the colored square.</p> <p>For example, if the selected date is the first day of a cycle, click Begin Cycle in the legend. The date changes to the color that corresponds to that Day Type.</p> <p>If you clicked an incorrect type of day, click the date on the calendar again, and then click the correct Day Type.</p> <p>To change a date back to a regular membership day, click the date on the calendar again, and then click the Membership Day Type.</p>
---------------------------	--

If you change the date for the end of semester 1, the corresponding grade reporting cycle end date is changed to match the new calendar date.

If you change the last day of school, the corresponding grade reporting cycle end date is changed to match the new calendar date. A message is displayed when you save.

If any of the previously set cycle end dates are no longer valid membership days, the cycle end date is changed to the last membership day before the original cycle end date. A message is displayed when you save.

You cannot change a membership day to a non-membership day (e.g., holiday) if absences are reported for that date. To verify dates on which attendance has been posted, run [SAT1800 - Attendance Audit Report](#), which lists absences by date.

MEMBERSHIP DAYS:

In the grid below the legend, data is calculated when the calendar data is saved:

Rptng Period	Mem Days	Shrtnd Mem Waiver Days	Non Mem Waiver Days	Daily Mins (DM)	Waiver Mins (WM)
Cycle 1	23	0	0	23	0
Cycle 2	43	0	0	43	0

Cycle 4	22	0	0	22	0
Cycle 5	20	0	0	20	0
Cycle 6	67	0	0	67	0
Total:	218	0	0	218	0
Yearly Total Mins(DM+WM):					218
Warning! Yearly Total Mins (DM+WM) must meet TEA guideline about minutes of operation.					

Rptng Period	Reporting periods for the campus are listed.
Mem Days	The number of membership days for each cycle is calculated and displayed. TWEDS Data Element: NUMBER-DAYS-TAUGHT (E0935)
Shrtnd Mem Waiver Days	The number of shortened membership waiver days for each cycle is calculated and displayed.
Non Mem Waiver Days	The number of non-membership waiver days for each cycle is calculated and displayed.
Daily Mins (DM)	The total number of instructional minutes for the cycle is calculated and displayed.
Waiver Mins (WM)	The total number of waiver minutes for the cycle is calculated and displayed.
Yearly Total Mins (DM+WM):	The total is calculated by adding the total number of daily minutes plus the total number of waiver minutes for the year. This value cannot be less than the state-mandated requirement of 75,600, except in rare circumstances. Under no circumstances can the total minutes be less than 71,400.

As you adjust membership minutes, the **Daily Mins (DM)**, **Waiver Mins (WM)**, and **Yearly Total Mins (DM+WM)** fields (below the legend) change accordingly.

When you apply a Day Type requiring minute adjustments to a valid membership date, a pop-up window provides options for adjusting minutes. The pop-up windows vary according to the adjustment you clicked:

[Adjust Minutes](#)

The Adjust Minutes type can be used when the daily minutes need to be extended or shortened.

An Adjusted Minutes day is a membership day.

NOTE: For the 2020-2021 school year, use **Adjust Minutes** for early release because shortened waiver days are no longer applicable as waiver days.

☐ Select one or more dates on the calendar, and click **Adjust Minutes**.

Type of Min	The field is set to Daily Minutes and cannot be modified.
Min	The Daily Minutes value is displayed by default. Type over existing data with the adjusted number of minutes of instruction on that date.
Event	The field is set to <i>01:Instructional Day</i> and cannot be modified.

☐ Click **OK**.

☐ Click **Save**.

The **Daily Mins (DM)** (cycle total) and **Yearly Total Mins** are automatically adjusted according to the difference between the **Daily Minutes** and the **Min** value entered. Following the previous example, both totals are reduced by 30 minutes ($450 - 420 = 30$) for each adjusted date.

Note that the dates on the calendar are now shaded pink because they are adjusted minutes days. The numbers are black because they are membership days.

Make-up Day

The Make-up Day type can be used any time a Saturday or holiday is used as a make-up date.

A make-up day *is* a membership day.

The selected date must be a Saturday or holiday.

☐ Select one or more dates (weekend or holiday) on the calendar, and click **Make-up Day**.

Type of Min	The field is set to Daily Minutes and cannot be modified.
Min	Type the number of minutes of instruction provided on the make-up date. This number cannot be less than the TEA minimum of 420.
Event	The field is set to <i>04: Make-up day</i> and cannot be modified.

☐ Click **OK**.

☐ Click **Save**.

The **Daily Mins (DM)** (cycle total) and **Yearly Total Mins** are automatically increased by the number of minutes entered.

Note that the date on the calendar is now shaded gray because it is a make-up day. The number is black because it is now a membership day.

Also, a membership day is added to the count in the **Mem Days** column for the cycle in which the selected date occurs.

NOTE: If you need to undo a make-up date, click the date, and then click **Weekend** to re-set the date to a regular weekend day.

Weather Day

A Weather day can be used when the school day is canceled or shortened due to inclement weather.

A weather day is *not* a membership day (whether or not there are any minutes).

☐ Select one or more dates on the calendar, and click **Weather Day**.

Type of Min	The field is set to Daily Minutes and cannot be modified.
Min	The field is set to <i>000</i> and cannot be changed, whether or not any minutes of instruction occurred that day.
Event	The field is set to <i>05: Weather day</i> and cannot be modified.

☐ Click **OK**.

☐ Click **Save**.

The **Daily Mins (DM)** (cycle total) and **Yearly Total Mins** are automatically decreased by the LEA's **Daily Minutes**. LEAs can use a waiver to cover the minutes lost.

Note that the date on the calendar is now shaded green because it is a weather day. The number is orange because it is now a holiday.

Also, a membership day is removed from the count in the **Mem Days** column for the cycle in which the selected date occurs.

Waiver Days

Waivers are used to get credit for minutes lost to legitimate school closures. For example, if a campus closes for an emergency, the campus cannot count the lost minutes of instruction, but the campus can get a waiver to make up for those lost minutes of instruction. The **Daily Mins (DM)** for the cycle are decreased by the number of lost minutes, but the **Waiver Mins (WM)** for the cycle are increased for that number of minutes; therefore the **Yearly Total Mins** remains unchanged because it is a zero sum.

Total waiver minutes cannot exceed 4200 minutes (or 2100 minutes for half-day PK campuses.)

Waivers cover the following situations:

Staff Development Waiver Day

The Staff Development Waivers are used when staff has training. This could include days when students are in attendance.

NOTE: Effective as of the 2018-2019 school year:

Staff Development Waiver Days are not allowed before the first day of school or after the last day of school (Rules 10200-0037 and 10200-0038).

Staff Development Waiver Days are allowed on the first or last day of school, as long as there are some instructional minutes on that date.

For the 2017-2018 school year, a staff development waiver day is not a membership day.

For the 2018-2019 school year and beyond, a staff development waiver day may be a membership day if there are instructional minutes.

☐ Select one or more dates on the calendar, and click **Waiver**.

Event	Select 01: <i>Staff Development Waiver Day</i> . For the next year calendar, this is the only option available.		
Type of Min	Waiver Minutes	Type the number of waiver minutes needed.	
	Daily Minutes	Type the number of minutes of instruction that will occur on this date.

- The **Waiver Mins (WM)** (cycle total) is increased by the number of waiver minutes.
- The **Yearly Total Mins** remains the same.

Note that the date on the calendar is now shaded yellow because it is a waiver day. The number is green because it is now an in-service date.

Also, a membership day is removed from the count in the **Mem Days** column for the cycle in which the selected date occurs (if applicable).

Missed School Waiver Day

The Missed School Waiver Day is used for an all-day emergency closure for a reason other than weather, or on days where staff is present for a reason other than staff development, such as cleanup after a natural disaster. Missed School Waiver Days can be during the school year or before the school year begins. Missed School Waiver Days prior to the start of school are reported with Cycle 1.

A missed school waiver day is *not* a membership day.

☐ Select one or more dates on the calendar, and click **Waiver**.

Event	Select 02: <i>Missed School Waiver Day</i> .		
Type of Min	Waiver Minutes	The field is set to the Minimum Daily Minutes by default. Type over existing data with the number of waiver minutes on that date.

Note that the date on the calendar is now shaded yellow because it is a waiver day. The number is orange because it is now a holiday.

Also, a membership day is removed from the count in the **Mem Days** column for the cycle in which the selected date occurs.

Low Attendance Waiver Day

The Low Attendance Waiver Day is used if a majority of students are not present. Example: a large number of students stay home one day due to safety concerns.

A low attendance waiver day is *not* a membership day.

☐ Select one or more dates on the calendar, and click **Waiver**.

Event	Select 04: Low Attendance Waiver Day.	
Type of Min	Waiver Minutes	The field is set to the Daily Minutes by default. Type over existing data with the number of waiver minutes on that date.

JJAEP School Day Waiver

The JJAEP is only available for campus-tracks where **Instructional Program Type** field on the [Campus Options](#) page is set to *13: Juvenile Justice Alternative Education Program (JJAEP) TEC 37.011 (f) (Rule #10200-0055)*.

A JJAEP waiver day is not a membership day.

- [Enter grade reporting ranges and conversions.](#)

[Grade Reporting > Maintenance > Tables > Campus Control Options > Ranges & Conversions](#)

This tab allows you to set campus options for ranges and conversions.

Highest Cycle Grade Allowed	Type the highest cycle grade allowed. If a grade can be higher than 100, this field must reflect that.
Lowest Cycle Grade Allowed	This field must be set to 000 as mandated by the state, per Texas Education Code 28.0216 .
Highest Exam Grade Allowed	Type the highest final exam grade allowed.

Low Exam Grade Allowed	Type the lowest final exam grade allowed.
Highest Non-Passing Grade	Type the highest numeric grade a student can earn and still not receive academic credit for a course. The value is used to determine whether credit is assigned by the Grade Computation and Credit Assignment utility. It is also used by the Assign Pass Fail Indicators utility. The value cannot be higher than the F value.
Display Numeric Grades as Alpha	Select if numeric grades should be displayed as alpha grades. The Grade Conversion Information fields change according to this selection.

Grade Conversion Information

These fields work in conjunction with the Grade Reporting utilities and reports and TeacherPortal. They are also used to calculate the college 4.0 GPA (see additional information below).

If **Display Numeric Grades as Alpha** is *not* selected:

Type the equivalent grades for the **ESNU** and **P** fields, and the **ABCD F** fields. The equivalent grades are used in determining which students are on the honor roll.

- The first row indicates which A-F grades correspond to E-P (excellent-pass) grades.
- The second row indicates the lowest numeric grade that corresponds to each of the A-D grades.
- The **F** field is used for the highest failing grade.
- The **D** field can be blank if the campus does not use the D grade. If the value for **D** is *not* blank, it must be between and not equal to the values for **C** and **F**.
- If the value for **D** is blank, the value for **F** must be one less than the value for **C**. There cannot be a gap between the values for **C** and **F**.

If **Display Numeric Grades as Alpha** is selected:

Type the equivalent grades for the **ESNU** and **P** fields, and the **ABCD F** fields, including the + and - for each letter. Duplicate numerical values are not allowed in any two fields. The letters (and + or -) will be displayed instead of their numerical equivalents in TeacherPortal and ASCENDER ParentPortal, and print on the Interim Progress Report (SGR1160). This field is only applicable to courses with middle or high school credit levels.

The first row indicates which A+-F grades correspond to E+-P (excellent-pass) grades.

- If any grade exists in one of the **ESNU** fields, they all must have a value.
- If any **E+-P** field has a letter equivalent, that letter grade must have numerical value.

The second row indicates the lowest numeric grade that corresponds to each of the A+-D grades.

You can leave + and - fields blank, but there must have equivalent grades in at least A, B, C, F, E, S, N, U, and P.

- The **F** field is used for the highest failing grade.
- The **D** field can be blank if the campus does not use the D grade. If the value for **D** is *not* blank, it must be between and not equal to the values for **C-** and **F**.

If the value for **D** is blank, the value for **F** must be one less than the value for **C-**. There cannot be a gap between the values for **C-** and **F**.

College 4.0 scale:

A student's college 4.0 scale is calculated based on the course grades earned by the student and the settings on this page.

The student's numeric grade is compared to the numeric grades entered for A, B, C, D, and F. The letter grades are then assigned as follows:

A = 4 points
B = 3 points
C = 2 points
D = 1 point
F = 0 points

The GA Tables and service IDs are not considered; however, the course's GA Weight is considered.

- [Enter grade reporting computation settings.](#)

[Grade Reporting > Maintenance > Tables > Campus Control Options > Computation](#)

This tab allows you to enter grade average computation settings for the campus.

Grading Concept	<p>Indicate how students are awarded credit for a course-section. The selection should be based on your district grading policy.</p> <p><i>Final</i> - Award credits based on the final grade.</p> <p><i>Sem/Final</i> - Award credits based on a combination of semester and final grades. If used, the Credit Seq field on Maintenance > District Schedule is also considered when you run the Grade Computation and Credit Assignment utility and the Assign Pass Fail Indicators utility.</p> <p><i>Semester</i> - Award credits based on the semester grade. The field is also used by the Assign Pass Fail Indicators utility.</p>
How will Avg be Computed	<p><i>Computer</i> - Semester averages are automatically calculated. This option must be selected if you are using the Grade Computation and Credit Assignment or Grade Computation Elementary utility.</p> <p><i>School</i> - Semester averages are manually calculated.</p>
Include Exam in Semester Average	<p>Select to include the semester exam grade when computing the semester average. The field is used by the Grade Computation and Credit Assignment utility.</p> <p>NOTE: Most elementary campuses do not use exam grades. However, for elementary campuses that want to include the exam grade in the semester average and display the Exam column in TeacherPortal, the Include Exam in Semester Average field must be selected.</p>

☐ If **Include Exam in Semester Average** is selected, indicate how much weight the exam has in the semester average:

Exam Weight Equal	<p>Select if the semester exam should be weighted equally with the cycle grades when semester averages are computed. If selected, the exam grade is given the same weight as the cycle averages when calculating the semester average. For example, if there are three cycles in the semester, the student's cycle averages are 80, 85, and 90, and the student earned 100 on the semester exam, the semester average calculation is as follows: $(80 + 85 + 90 + 100) / 4$</p> <p>If Exam Weight Equal is not selected, the Total Weight and Exam Weight fields are used together to indicate the percentage the semester exam should count toward the total semester grade.</p>
--------------------------	--

**Exam
Weight
Total
Weight**

These fields are used only if all of the following are true:

- **Exam Weight Equal** is not selected.
- **How will Avg be Computed** is set to *Computer*.
- **Include Exam in Semester Average** is selected.

The semester average calculation for a three-cycle semester is as follows:

$$((\text{Cycle 1} + \text{Cycle 2} + \text{Cycle 3}) / 3 \times (\text{Total Weight} - \text{Exam Weight})) + (\text{Exam Grade} \times \text{Exam Weight}) / \text{Total Weight}$$

For example, if there are three cycles in the semester, the student's cycle averages are 80, 80, and 80; the student earned 90 on the semester exam; the **Total Weight** is 050; and the **Exam Weight** is 07, the semester average calculation is as follows:

$$(80 + 80 + 80) / 3 \times (50 - 7) + (90 \times 7) / 50 = 81.4$$

Commonly used semester exam percentage examples:

Semester Exam Percentage of Semester Grade	Total Weight	Exam Weight
10%	050	05
14%	050	07
15%	020	03
20%	005	01
25%	004	01
no semester exam	000	00

Allow Recomputation	<p>If selected, all grades and credits are recalculated according to the settings of the Compute Sem Avg, Compute Final Grades, and Award Credits fields when running the Grade Computation and Credit Assignment or Grade Computation - Elementary utility.</p> <p>If not selected, only students with blank semester grades, blank final grades, or blank or zero credits are updated, depending on the options selected when running the grade computation utilities.</p>			
	Allow Recomputation	Blank out Semester/Final on Grade Change	Remove Credit on Grade Change	What happens?
	Blank	Selected	Selected	This allows the grade computation utilities (secondary or elementary) to recalculate <u>only blank</u> grades.
	Selected	Blank	Blank	This allows the grade computation utilities to recalculate <u>all</u> grades.
	Blank	Blank	Blank	This allows the grade computation utilities (secondary or elementary) to recalculate <u>only blank</u> grades.
	Selected	Selected	Selected	Not recommended.
Blank out Semester/Final on Grade Change	<p>Select to clear the Sem and Final grades on Grade Reporting > Maintenance > Student > Individual Maint > Grd Update upon saving when a cycle or exam grade is changed. When manually updating Sem and Final grade fields, you must first save the cycle or exam grade change to prevent them from being cleared by the initial save.</p> <p>The Sem and Final grades will be populated next time the Grade Computation and Credit Assignment utility is run.</p>			
Remove Credit on Grade Change	<p>Select to clear the Credit field on Grade Reporting > Maintenance > Student > Individual Maint > Grd Update upon saving when a cycle or exam grade is changed. When manually updating Credit field, you must first save the cycle or exam grade change to prevent the field from being cleared by the initial save.</p> <p>The Credit field will be populated next time the Grade Computation and Credit Assignment utility is run.</p>			

Don't Allow Credit If Failed Last Sem	<p>Select if students who failed the last semester of a course will not receive credit.</p> <p>If selected, and a student fails the last semester of a course, the student will not receive credit for the course. This field overrides courses set up to allow partial credit.</p> <p>For the Grade Computation and Credit Assignment utility, the field is considered only if the Grading Concept field is set to <i>Semester</i>. Grade Point H/R Exclude Message Print Option	Indicate if you want to print the student's name on the honor roll report, and whether the course should be excluded from the course count. The field works in conjunction with the HRoll Cd field on Maintenance > Master Schedule > District Schedule as follows:

	Print name & Exclusion Msg	Exclude Course	The student name is printed on the honor roll report. Course Count excludes the course. The message "Student not eligible for Honor Roll" is <i>not</i> printed.

☐ Under **Grade Averaging Information:**

Grds Used for Grade Avg	<p>Type the code indicating how grade average and class rank are calculated:</p> <p>C - By averaging all cycle grades F - By using final grade entered by user S - By averaging semester grades (most common for high school campuses)</p> <p>NOTE: This setting of this field affects the grade number used in assigning the point scale entered on Ranges & Conversions. This will, in turn, affect college 4.0 scale grades.</p>
--------------------------------	--

Low Grade For Average	<p>Type the lowest numeric grade that is considered during grade averaging.</p> <p>This is the lowest grade a student can receive to be used in the grade average calculations. If a student's grade is lower than this grade, the Grade Averaging and Class Ranking utility will use the grade in this field as the student's grade. For example, if this field is set to 50, and the student receives a grade of 45, the utility will use 50 for the student's grade.</p> <p>Most campuses set this field to 50 or 00.</p>
------------------------------	--

☐ In the **College 4pt Scale** field, indicate if you want to compute 4-point grade averaging information when the [Grade Averaging and Class Ranking utility](#) is run.

You can select to calculate with/without zero-weighted courses, or to not compute 4-point grade averaging information. This is often referred to as the College Grade Point Average. If used, the student's grades are converted according to the [Ranges and Conversions tab](#).

This is an additional method for calculating grade average, and it will not match other grade point averaging methods.

Most high school campuses use the 4-point scale.

Some colleges require grades that do not include zero-weighted courses.

NOTE:

If you select *0 - Don't compute*, a student's existing 4-point average will not be overwritten.

If you select *2 - Compute & incl 0 wgt crs*, zero-weight courses are treated as if the weight is 1. For example, if you have three course records with weight 1, and you have one course with weight 0, the program adds the four scores and divides by 4.

4-point Scale Example:

The Ranges and Conversions tab values are set as follows:

The following points are awarded:

Grade Ranges	Points Awarded
A: 100 - 090	4.0
B: 089 - 080	3.0
C: 079 - 075	2.0
D: 074 - 070	1.0
F: 069 - 000	0.0

These are sample grade conversions for a student's un-weighted 4-point average using semester 1 grades:

Semester 1 Grades	Points Awarded
92	4.0
89	3.0
77	2.0
74	1.0
65	0.0
95	4.0
80	3.0
# Courses = 7	Total Points = 17

The student's un-weighted 4-point average is calculated as follows:

$$\text{Total Grade Points} / \text{Number of Courses} = 17/7 = 2.4$$

Four-point average is calculated according to the **College 4pt Scale** field on [Maintenance > Tables > Campus Control Options > H Roll & Gr Avg](#). The 4-point average may be calculated with or without weighting. Points are assigned according to the values for the **Grade Conversion Information A, B, C, D, and F** fields on [Maintenance > Tables > Campus Control Options > Ranges & Conversions](#).

- A = 4 points
- B = 3 points
- C = 2 points
- D = 1 point (if using Ds)
- F = 0 points

Low grade for average:

If a student's grade is lower than the **Low Grade for Average** value on [Maintenance > Tables > Campus Control Options > H Roll & Gr Avg](#), the **Low Grade for Average** value is used in place of the student's grade.

If final grades are used for grade average:

A partial record is used if the following conditions occur:

- The student is enrolled in part of a course, and no other section exists that

would make the course complete.

- The course allows partial credit.
- A final grade exists.

If a student is enrolled in part of a course, and there is another section that would make the course complete, the final from the other section is used.

If a student is enrolled in the complete course, but in two sections, both records are used.

Nbr of Decimal Points	Type the number of places to the right of the decimal point to which grade averages are computed (0-5). Many campuses set this field to 5.
Incl Wdrawn Stu in Avg	Select if you want to compute grade averages for students who withdrew after the first cycle. Normally, withdrawn students are <i>not</i> included.
Incl Wdrawn Stu in Rank	Select if you want to include withdrawn students in class rank. Normally, withdrawn students are <i>not</i> included in the rank.
Incl Wd Crs in Rank	Indicate how withdrawn courses should be handled with grade average for class rank. A - Include withdrawn courses in calculations. G - Include withdrawn courses if there is a grade for the course. N - Do not include withdrawn courses. (most common option) NOTE: Withdrawn self-paced courses with a semester grade are included, regardless of this field, if they are eligible courses.

NOTE: These options also affect how college 4.0 scale grades are calculated.

- Semester grade calculations

If you are including the exam grade, the following formula is used to calculate the semester average:

$$\left(\left(\text{Cycle 1} + \text{Cycle 2} + \text{Cycle 3} \right) / 3 \times \left(\text{Total Weight} - \text{Exam Weight} \right) \right) + \left(\text{Exam Grade} \times \text{Exam Weight} \right) / \text{Total Weight}$$

If you are not including the exam grade, the following formula is used to calculate the semester average:

$$\left(\text{Cycle 1} + \text{Cycle 2} + \text{Cycle 3} \right) / 3$$

- Final grade calculations

- If you are not computing the semester average, the following formula is used to calculate the final grade:

$$\left(\text{Cycle 1} + \text{Cycle 2} + \text{Cycle 3} + \text{Cycle 4} + \text{Cycle 5} + \text{Cycle 6} \right) / 6$$

- If you are computing the semester average, the following formula is used to calculate the final grade:

This tab allows you to set up elementary courses by grade level.

The grade level must be defined on the [Elem Grade](#) tab before you can add course information on this tab.

IMPORTANT: Do not include one-semester courses when setting up courses by grade level. Instead, add one-semester courses as needed using [Maintenance > Student > Group Maint > Add/Delete Courses](#). This tab allows you to set up non-core course alpha grades with their equivalent numeric grades. The table is used to convert all grades (including exam grades) posted to non-

core courses.

The application averages grades based on their numerical values, not the median value of the letter grade.

Example : E is set to be between a 90 and 100, and a student has a grade of 99. The student's grade is averaged using the numeric value of 99 instead of the median value of E (which would be 95). One option to narrow the range of numbers is to add pluses and minuses to all letter grades (e.g., set E- from 90 to 93, E from 94 to 96, and E+ from 97 to 100).

Crs Seq

The code is used when extracting course completion data for PEIMS and during end-of-course precoding.

In most cases, this field should be left blank.

The field should only be used if the course, or part of the course, is taught out of sequence such as a credit recovery or self-paced course (e.g., the second semester of English I is taught during the first semester).

Leave this field blank if the course is not taught out of sequence. The PEIMS Classroom Link extract will extract the proper course sequence code.

TWEDS Data Element: COURSE-SEQUENCE-CODE (E0948) (Code table: C135)

This field exists on the district-level course record ([Maintenance > Master Schedule > District Schedule](#)) and the campus section record ([Maintenance > Master Schedule > Campus Schedule > Section](#)). If the campus section record has a value, that value is used. Otherwise, the district value is used.

When the field is blank on both the campus and district records, the default values are used, which are based on the **Nbr Sem** field on the district course record, as follows:

- If **Nbr Sem** is 1, the default value for course sequence is 0 (i.e., one-semester course).
- If **Nbr Sem** is 2, the default value considers the student's course assignments. For example, if the student is taking a two-semester course, the default course sequence for the first semester of the course is 1 (i.e., first half of a two-semester course), and the default course sequence for the second semester of the course is 2 (i.e., second half of a two-semester course).
- For a four-semester course, if the exam/semester pattern is 2, this field must be set to 1 or blank. However, if the exam/semester pattern is not 2, this field must be set to 6 or blank.

•
An error message is displayed if you select a code that does not match the [course sequence code table](#).

The table shows the course sequence codes allowed when campus and district options are selected.

For more information on running ASDR, refer to the [End-of-Year & Annual Student Data Rollover \(ASDR\)](#).

Order for record status codes

Record status codes are processed in the following order:

- Record status 2 (currently enrolled at this campus, will return next year)
- Record status 4 (enrolled at another campus, will attend this campus next year)
- Record status 1 (currently enrolled at this campus)
- Record status 5 (not currently enrolled in this district, will attend next year)
- Record status 3 (currently enrolled at this campus, will attend new campus next year)

Existing campus options are displayed and can be modified.

☐ Click **+Add** to add a campus or range of campuses and tracks.

A blank row is added to the grid.

Campus From Campus To	<p>Specify a campus or range of campuses. The options selected on each row apply only to the campuses in the range specified in these fields.</p> <ul style="list-style-type: none"> • You must account for all campuses in the district. Every campus in the district must be included in a range. • If there is only one campus in the range, type the same campus ID in both fields. • If a campus has multiple tracks, the campus must be listed in the Campus From and Campus Thru fields for each track. • Some campus IDs within the range might not be valid campus IDs; they are bypassed. <p>IMPORTANT! If you include more than one campus in a range, be sure that the selected options are appropriate for all campuses in the range.</p>
Campus Track	<p>Type the track for which the options apply.</p> <p>Options must be set for every track at the campus.</p> <ul style="list-style-type: none"> • A set of next year attendance options must already be built for every track at every campus. • Include each track at each campus, unless Exclude Campus is selected for the campus. Students whose next year track does not exist will be dropped in the next school year and will be included on the Dropped Stu List report but not written to the leaver table. • Campuses included in the range on the same row must have the same first day of school for the track specified. <p>NOTE: If the district has multiple half-day tracks, PK students should be pre-registered to the track they will be on for the next school year.</p>

Set to Campus Track	<p>Use the two fields to move students from one track to another during ASDR.</p> <p>Select the check box and type a track in the input field if all students at the original campus and track will be moved to the entered track when ASDR is run. It will remain disabled after you save; you must clear the check box if you need to reset First Day Of School for any reason (e.g., to change or correct data). <p>It is recommended that you do <i>not</i> use this option to move students from a half-day track to a full-day track.</p>
Exclude Campus	<p>Select to exclude the campus from ASDR. This option is used for a campus that will not be active or used in the next school year. If the campus is excluded, no next year records are created for the campus.</p> <p>Because historical information is saved, a campus must be excluded instead of deleted so that the data is saved in the historical records.</p> <ul style="list-style-type: none"> • If a campus will not be used next year, but it still has student records (such as leaver records), do not exclude the campus. Instead, set ASDR options to drop the student records when ASDR is run by selecting Drop Wd Stu New Sch Yr, Drop Status =1 New Sch Yr, and Drop Unsched Stu New Sch Yr on the Campus ASDR Options tab). When the campus is accessed in the next school year, there will be no student records for the next school year (except for the leaver records). • If you exclude a campus with enrolled students, the students are not rolled over during ASDR. Their records are written to the historical tables for the excluded campus. If the student does not have a valid next year campus, he will be dropped in the next school year.
First Day of School	<p>This date is automatically set to the first day of school for all next year campuses when next year attendance calendars are created. This date will be used as the campus entry date, original campus entry date, and course entry date for all students is displayed.</p> <p>The date may also be used for the entry date for special programs. VII. Campus Scheduling Options

If you are building the campus for the next school year before running Annual Student Data Rollover, and before completing Summer PEIMS, you must also set up Scheduling options. Otherwise, this step is not necessary because the fields are populated during Annual Student Data Rollover.

Set up Scheduling options if needed.

[Scheduling > Maintenance > Master Schedule > Campus > Campus Control](#)

This tab allows you to set up scheduling options for a campus. These options apply to the upcoming school year and must be set before you can access the campus master schedule. The Master Schedule > Campus tabs are disabled until these settings are saved.

[Create assignment categories.](#)

[Grade Reporting > Maintenance > TeacherPortal Options > Campus > Categories](#)

This tab allows you to establish a list of categories that instructors can use when adding assignments in ASCENDER TeacherPortal. The categories describe the types of assignments the instructors will use in their courses (e.g., Tests, Homework, and Labs).

For each category, you can assign a default weight. The weight is the percentage of the student's cycle-course grade for which the category average counts. Instructors can override the default weights if they want to use different weights for their courses, unless the weight is locked. The types of weights allowed for categories is set up on the Options tab.

You can use this tab to establish a master list of categories for each campus. If an instructor has an assignment that falls under a category that is not included in this list, he can create a new category using the Administer Categories page in TeacherPortal. The category he creates is added to the master list and becomes available for all instructors at his campus to use. The list of categories continues to grow as instructors add categories.

NOTE: The **Allow New Categories** field on the [Options](#) tab allows you to indicate if instructors are allowed to add new categories in TeacherPortal.

Existing categories are displayed in alphabetical order.

- If there are multiple pages, [page through the list](#).

Weight Type	Select the weighting type to be used for the category.

☐ To edit a record, type over the existing data.

NOTE: If a category is in use by a course, only the description can be modified; the category cannot be deleted, and all other fields are disabled.

☐ Click **Save**.

A category cannot be deleted if it is used by a course. You must remove it from all courses before it can be deleted.
