## Attendance > Reports > Attendance Reports > Audit > SAT0500 - Campus Attendance Summary

This report provides absence data by period for students at a specified campus and track. A report is generated for every date within the date range on which at least one student was posted absent. It also prints either the parent home or work phone number to use for notifying parents.

The report can be used to verify the attendance for each day, period, and code. For campuses at which attendance is posted for all periods of the day, the report can be used to track attendance by period to determine patterns in student absences.

### Run the report:
