SAT0600 - Student Detail Report

Attendance > Reports > Attendance Reports > Audit > SAT0600 - Student Detail Report

This report lists individual student demographic and membership information and provides summary totals of membership and absences for a specified semester, or cycle, or date range. The report lists cumulative full-time equivalency (FTE) numbers.

The report is run by campus and track, and is for the current year only. You cannot run a district-wide report. To get district totals, you must run the report for each campus and add the campus totals. The final summary provides CTE and Special Ed FTE numbers that can be added with other campuses and tracks for the district to compare against all but the summary page of SAT0950.

- The report is sorted by grade level and then student name. The report includes attendance for students with membership days for the semester, cycle, or date range selected.
- If errors are encountered, an error report is produced.
- A summary page prints after each grade level that displays totals for special education and Career and Technical Education (CTE) contact hours. The totals on the summary page should match the totals on SAT0900 - Campus/District Summary Report (if the report is run for the same semester, cycle, or date range).
- Another summary page prints after each grade level that displays a weekly summary of total membership, total absent, total present, total ineligible, and total eligible days. The totals on the page should match the totals on SAT0900.
- At the end of the report, the two summary pages are printed for all grade levels. The totals should match the totals on SAT0900.

When SAT0600, SAT900, SAT2100 or SAT2300 are run for the entire year (and added up, if necessary), all numbers from the summaries should be the same (within one-tenth).

This report is an auditable document. See the Student Attendance Accounting Handbook for more information.
