SAT1100 - District Recap Report

Attendance > Reports > Attendance Reports > Membership > SAT1100 - District Recap Report

This report provides a snapshot of enrollment and program counts for the district. When compared to the combined totals of all campuses within a district, the report indicates fewer inactive students and subsequently smaller totals. The district only counts a student once as active or inactive (e.g., moved out of the district). A campus counts a student as inactive (e.g., moved from the campus) even if he is still active at another campus in the district. Therefore, a campus may count the student inactive, while the district counts the same student active, resulting in smaller district inactive and total counts.

If no students are enrolled in a program, the count is 0.

All programs are listed on the report, even if they are not offered at the district/campus.

Campuses that are excluded from district are not included.
