Table of Contents

SDS1000 - PEIMS Report 1

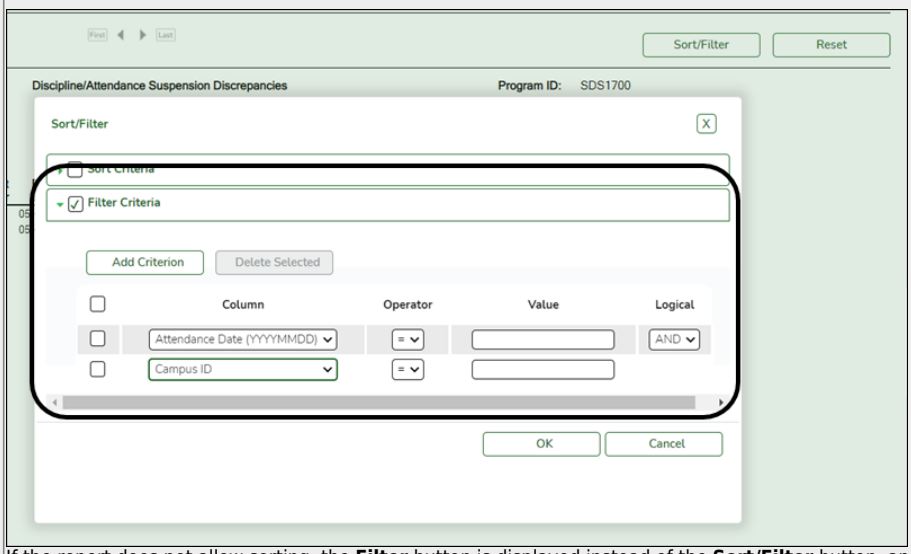

SDS1000 - PEIMS Report

Discipline > Reports > Discipline > SDS1000 - PEIMS Report

The report prints PEIMS discipline data by grade level and campus. For each incident listed, the first action and offense with a PEIMS code are displayed, and the offense code that will be extracted for PEIMS is indicated.

If a court-ordered restriction exists, all incident data for the student is restricted.

Parameter	Description		
Ending School Year (YYYY)	Type the four-digit **ending** school year.		
Campus ID (Blank for All)	Type the three-digit campus ID, or click ⋮ to select the campus. Leave blank to select all campuses in the district. **NOTE:** If you select to create the report for all campuses, any campuses excluded from district reporting (i.e., campuses that have the **Exclude from District Reporting** field selected on Registration > Maintenance > Campus Profile > Campus Information Maintenance > Control Info) are not included in the report. However, you can generate the report for an individual excluded campus by entering the campus ID.		
Include Withdrawn Students (Y, N)	Y - Include withdrawn students. N - Do not include withdrawn students.		

Parameter	Description		
From Incident Date (MMDDYYYY)	^Filter| Filter report data.	**Filter** When you want to view only certain data, you may find it useful to filter the report data. You can use specific criteria to retrieve only the data that you want. Not all reports allow this option. From the report window, click **Sort/Filter** to open the Sort/Filter window. By default, the **Sort Criteria** section is expanded. Click **Filter Criteria** to expand the **Filter Criteria** section.  If the report does not allow sorting, the **Filter** button is displayed instead of the **Sort/Filter** button, and sort criterion fields are not available. Click **Add Criterion** to add new filter criteria. A blank row is added to the grid. **Column** — Select a field by which to filter the data. The drop down lists the columns that appear on the report. **Operator** — Select an operator. = Equals ≠ Not equals › Greater than ≥ Greater than or equal to ‹ Less than ≤ Less than or equal to **Value** — Type the value by which you want to filter. For example, if you selected a date in the **Column** field, type a date to view only data for a specific date. **Note:** When filtering report data by date, you must use the following formats: • If the date is displayed in the MM/DD/YYYY format, the filter value must be in the YYYYMMDD format. • If the date is displayed in the MM/YYYY format, the filter value must be in the YYYYMM format. • If the date is displayed in the MM/YY format, the filter value must be in the YYMM format. **Add Criterion** — Add another row. Select the logical connector (*AND* or *OR*) in the **Logical** field. Continue adding rows as needed. The **Logical** field does not appear until you click **Add Criterion** to add an additional row. • Using the AND operator limits search results, because the program looks only for records that contain both criterion. • Using the OR operator expands search results, because the program looks for records that contain either one criterion or the other, or both. **Delete Selected** — Delete selected row. Select the row, and then click the button. The row is deleted from the filter criteria. Click **OK** to apply the selected filter criteria to the report. Click **Cancel** to close the dialog box without applying a filter. **NOTE:** Some applications allow you to filter by specific data: In Test Scores, you can filter report data to include only students who are enrolled in special programs. When filtering report data for At Risk, PRS, and GT programs, you must select 1 (Yes) or 0 (No) in the **Value** field. For example, if you filter report data for the At Risk program by selecting *Equals* in the **Operator** field and *Yes* in the **Value** field, no data is displayed; however, if you select *1* in the **Value** field, the At Risk data is displayed. ^Reset| Reset report data.	Click to restore the report to the original view, removing all sorting and filtering that has been applied. ++
