

attendance_posting_errors

Table of Contents

The button appears if errors are encountered on any attendance posting tab, and a pop-up window opens automatically which lists the tab name containing the error, and the error message.

Click the tab name to go to the tab where the error exists. The field(s) containing errors are highlighted red.

The Error pop-up window is updated as errors are corrected.

If all errors are corrected, the Error pop-up window and **Errors** button are no longer displayed.

If you close the Error pop-up window and errors still exist, click the **Errors** button to re-open the pop-up window.
