grade_reporting_schedule_audit

Table of Contents

The Search for Schedule Changes window opens to display a detailed list of the student's current year schedule changes.

A record is created when a course is changed, added, deleted, withdrawn, or reentered. The schedule audit log includes data from all campuses for which the student has current year course records.

To narrow the list, enter one:

Course Nbr	Type the course number, or first few characters of the course number, to narrow the list by course number.
Title	Type the course title to narrow the list by course title.

Click **Search**. The student's schedule change records are displayed in the grid according to your search criteria.

- The list can be re-sorted.

  You can re-sort the grid by clicking on an underlined column heading. It will sort in ascending order. Click it again to sort in descending order.

  A triangle next to the column heading indicates the column by which the grid is currently sorted and whether it is sorted in ascending or descending order.

  To reset the grid to the default sort order, click **Search** again.

- If more courses are retrieved than can be displayed on one page, you can page through the list.

| **Print** | The button is displayed if a medical warning exists for the student and **Consent to Display Alert** is selected on Health > Maintenance > Student Health > Emergency.

Click to view the student's medical alert information.
