

health_tables_immunizations_body

Table of Contents

Existing immunization type codes are listed in order by code. The system codes (1-69) are listed first, and user-defined codes (70-99) are listed next.

Click **+Add** to add an immunization type.

A pop-up window opens.

The dialog box is titled "Immunization Type". It contains two input fields: "Code:" and "Description:". Below the fields are two buttons: "OK" and "Cancel".

Code	Type a two-digit code for the immunization type (70-99).
Description	Type the description for the code, up to 40 characters. NOTE: Only the first 35 characters of the description are included in the TREx Export file.

Click **OK** to close the window. The new immunization type is displayed in the grid.

Click **Save**.

 Edit a description. Update the fields as needed, click OK , and then click Save . The changes are displayed in the grid. Or, click Cancel to close the window without making changes.
 Delete a code. 1. Click  to delete a row. The row is shaded red to indicate that it will be deleted when the record is saved. You can select multiple rows to be deleted at the same time. 2. Click Save . You are prompted to confirm that you want to delete the row. Click Yes to continue. Otherwise, click No . You can save edits and delete records in the same step (i.e., the changes are all committed when the record is saved). You cannot delete an immunization code that is used in a student record.
