registration_begin_date

Table of Contents

Type the begin date using the MMDDYYYY format. Or, click to select the date from a calendar.

The client has to put an as-of date on the screen for the import. On import, the following will happen for each student in the import file. * if the as-of date entered is prior to the student's end date, we can update the new record's begin date to match the student's end date. List data that is modified. * As of date is 10/13, but census block exist date is 10/15, update the new census block record entry date to 10/15 * If data is updated, list update on report. * if the as-of date entered is after the student's end date, use the as of date entered. * As of date is 10/15, but census block exist date is 10/13, the new census block record entry date to 10/15 * if the census block record does not have an end date, but is in the import file, do not import file - throw error. * if the census block number has not changed - throw error
