

registration_utilities_activatestudents_intro

Table of Contents

This utility allows campus staff to activate individual or groups of students who could not be activated from TeacherPortal, such as a student who shows up on the first day of school but was not on any attendance rosters.

Users can activate a group of students in a particular grade level or course; or they can activate an individual student if needed.

NOTE: If a student is activated after the first day of school, all of the special programs the student has will get the record with the first day of school set to No-Show and a new row inserted with the new entry date.
