

scheduling_ra_section_instructor_id

Table of Contents

Click ⋮ to select the instructor assigned to the meeting time.

If the **Cond** fieldset to is *D*, three **ID** fields are displayed allowing you to select up to three designator codes from Maintenance > Master Schedule Generator > Tables > Designators.

The Master Schedule Generator attempts to assign the instructor to the meeting time. If the instructor cannot be assigned, the meeting time may not be generated. However, when you run the generator, you will have the opportunity specify that a meeting should be generated even if an instructor cannot be assigned (i.e., by selecting **Generate if Unable to Assign Tchr** on Maintenance > Master Schedule Generator > Generate Campus Schedule > Options).

If you assign a room and instructor, and the instructor has a reserved room assigned (**Rsrvd Room** field on Maintenance > Master Schedule Generator > Resource Allocator > Instructors), the room on the Section Info tab will override the instructor's reserved room.
