

Select IEP Enabling Objective

Table of Contents

Select IEP Enabling Objective 1

Select IEP Enabling Objective

The enabling objective lookup displays all district-defined IEP Enabling Objectives.

Select an enabling objective:

1. To search for an objective, begin typing the code or description in the **Search** field. The list is automatically filtered to display the enabling objectives with IDs or descriptions that *contain* the characters you have typed.
2. When you locate the objective you want to retrieve, click the code. The lookup closes, and the field is populated with the objective ID.

Click **Cancel** to close the lookup without selecting an objective.
