Select IEP Enabling Objective

The enabling objective lookup displays all district-defined IEP Enabling Objectives.

Select an enabling objective:

- 1. To search for an objective, begin typing the code or description in the **Search** field. The list is automatically filtered to display the enabling objectives with IDs or descriptions that *contain* the characters you have typed.
- 2. When you locate the objective you want to retrieve, click the code. The lookup closes, and the field is populated with the objective ID.

Click **Cancel** to close the lookup without selecting an objective.
