Select IEP Performing Objective 1

Select IEP Performing Objective

The performing objective lookup displays all district-defined IEP Performance Objectives.

Select a performance objective:

1. To search for an objective, begin typing the code or description in the **Search** field. The list is automatically filtered to display the performance objectives with IDs or descriptions that *contain* the characters you have typed.
2. When you locate the objective you want to retrieve, click the code. The lookup closes, and the field is populated with the objective ID.

Click **Cancel** to close the lookup without selecting an objective.
