Street Directory Search

This directory is used to search for a street segment and retrieve the segment to the page from which you accessed the directory.

Search for a street segment:

❏ Enter data in one or more of the following fields.

Direction	If applicable, type the compass direction associated with a street name, up to two characters (e.g., S, SW, NE).
Street Name	(Required) Type the street name, up to 19 characters. As you begin typing, the a drop-down list displays streets that begin with the characters you have typed. From the drop-down list you can select the street. Only the following characters are allowed: alpha, numeric, space, hyphen, period, #, /, and apostrophe.
From/To	Type the lowest and highest street numbers in the street segment, up to five digits each. These fields are disabled if **Selection Begins With** is selected.
E/O/B	Indicate whether the segment includes only the odd-numbered side of the street (O), only the even-numbered side of the street (E), or both (B).

❏ Select **Selection Begins With** to retrieve all streets beginning with those that match the characters entered.

If not selected, only matching street names are retrieved.

NOTE: If selected, the **From/To** street number fields are disabled.

❏ Click **Retrieve**.

The street segments that meet the criteria entered are displayed.

❏ Click the street name for the segment you want to retrieve.

The directory closes, and the street segment information is displayed on the page from which you accessed the directory.

❑ Click **Cancel** to return to the previous page without selecting a street segment.
