Noncore Grd Cvsn

Grade Reporting > Maintenance > Tables > Elementary > Noncore Grd Cvsn

This tab allows you to set up non-core course alpha grades with their equivalent numeric grades. The table is used to convert all grades (including exam grades) posted to non-core courses. The application averages grades based on their numerical values, not the median value of the letter grade.

Example : E is set to be between a 90 and 100, and a student has a grade of 99. The student's grade is averaged using the numeric value of 99 instead of the median value of E (which would be 95). One option to narrow the range of numbers is to add pluses and minuses to all letter grades (e.g., set E- from 90 to 93, E from 94 to 96, and E+ from 97 to 100).

Update data:

Existing	A つ t つ	10	dich	121/24
- x 1 \ 1 1 1 1 1 1 1	uala		(11×11)	1avec
	aaca	10	a D	iayca.

☐ Click **+Add** to add data to the table.

A blank row is added to the grid.

Or, click +Add 10 to add ten blank rows.

Alpha Grade Type the alpha grade to be converted (e.g., E+).		
Hiç		Type the highest value of the numeric grade range for the alpha grade. This value is used when computing grade averages.
Lo	w Grade	Type the lowest value of the numeric grade range for the alpha grade.

☐ Click **Save**.

Delete a row.

- 1. Click \square to delete a row. The row is shaded red to indicate that it will be deleted when the record is saved. You can select multiple rows to be deleted at the same time.
- 2. Click **Save**. You are prompted to confirm that you want to delete the row. Click **Yes** to continue. Otherwise, click **No**.

You can save edits and delete records in the same step (i.e., the changes are all committed when the record is saved).
