# Sending Campus (Reverse Scheduling Transfer)

**Registration > Utilities > Reverse Scheduling Transfer > Sending Campus**

**Use this utility if you are logged on as the sending campus.**

This utility reverses a scheduling transfer. At the sending campus, all records with record status code 3 are reset to record status code 1. At the receiving campus, all records with record status code 4 are deleted.

A reverse scheduling transfer can be performed by either the sending campus or the receiving campus. If you are logged on as the receiving campus, use the [Reverse Scheduling Transfer > Receiving Campus utility](#).
