

Build (MSALGO)

Table of Contents

Build (MSALGO) 1

Build (MSALGO)

Scheduling > Maintenance > MSALGO > Process > Build

This tab allows you to enter the number of sections for each course for the Master Schedule Algorithm (MSALGO). The tab displays course data from the next year course file, including the course number and title, number of semesters, number of periods the course meets (derived from the number of semesters and the period control from the scheduling course record), and tally counts.

Build course data:

Section data should only be entered after the MSALGO options have been verified on the Options tab.

The courses are displayed in the upper grid in course number order.

Course requests and conflicts by team are displayed in the lower grid.

❑ Add section data:

Number of Sections	For each course, type the number of sections.

❑ Click **Save**.

When all courses have the correct number of sections, proceed to the Place tab.
