SCH0550 - List of Students Requesting Alternates 1

SCH0550 - List of Students Requesting Alternates

Scheduling > Reports > Scheduling Reports > Pre-Load > SCH0550 - List of Students Requesting Alternates

This report lists students and their first, second, and third alternate course selections. You can view requests for specific courses or all courses.

The report may be useful if a campus needs to delete a course number. Since you cannot delete a course if it has any requests, including alternate course requests, the report lets you see which students have requested the course, and remove those requests, which will allow you to delete the course.

- If you specify an alternate request and no course request, the list will include all courses for which the specified course was chosen as an alternate.
- If you specify a course request and no alternate request, the list will include all courses chosen as alternates for the specified course.
- If you specify both an alternate and a course request, the list will only display data if the specified alternate was chosen as an alternate for the specified course.
- If you do not specify either an alternate or a course request, the list will include all alternates chosen for each course. The alternate requests for each course are listed on separate pages.

Run the report:

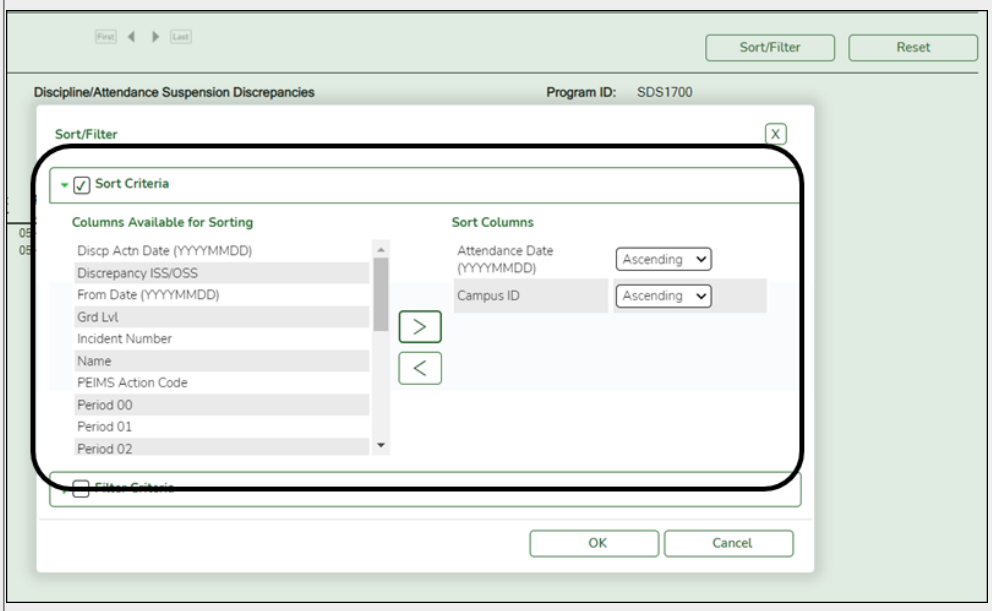

Parameter	Description
Campus ID (Blank for All)	Type the three-digit campus ID, or click ⋮ to select the campus. Leave blank to select all campuses in the district. **NOTE:** If you select to create the report for all campuses, any campuses excluded from district reporting (i.e., campuses that have the **Exclude from District Reporting** field selected on Registration > Maintenance > Campus Profile > Campus Information Maintenance > Control Info) are not included in the report. However, you can generate the report for an individual excluded campus by entering the campus ID.
Alternates Course Nbrs (Blank for All)	Indicate if you want to view a list of students who have requested specific alternate courses. Type the course number(s), including all leading zeros and separating multiple courses with a comma (e.g., 0100,0110). Or, click ⋮ to select the course(s). Leave blank to select all courses in the district.
Course Request Nbrs (Blank for All)	Indicate the course for which the alternate was selected. Type the course number(s), including all leading zeros and separating multiple courses with a comma (e.g., 0100,0110). Or, click ⋮ to select the course(s). Leave blank to select all courses in the district.
Include Withdrawn Students (Y, N)	Y - Include withdrawn students. N - Do not include withdrawn students.

Other functions and features:

Sort

Sort report data.
You can sort data to make it easier to review or find records in the reports. Not all reports allow this option.

In the report window, click **Sort/Filter** to open the Sort/Filter window. By default, the **Sort Criteria** section is expanded. If not, click **Sort Criteria**.

(Left grid) Columns Available for Sorting	Click the field by which you want to sort, and then click >. The field moves to the right grid. Continue moving fields to the right grid as needed.
(Right grid) Sort Columns	You can rearrange the fields to indicate the order in which you want the sort applied. Click a field name, and drag it up or down to a new location. • In the right grid, for each field, indicate if you want that data sorted in ascending (e.g., A-Z, 0-9) or descending (e.g., Z-A, 9-0) order. • To remove a field from the sort, select the field, and then click < to move it back to the left grid.

Select the **Sort Criteria** check box and click **OK** to apply the selected sort criteria to the report.

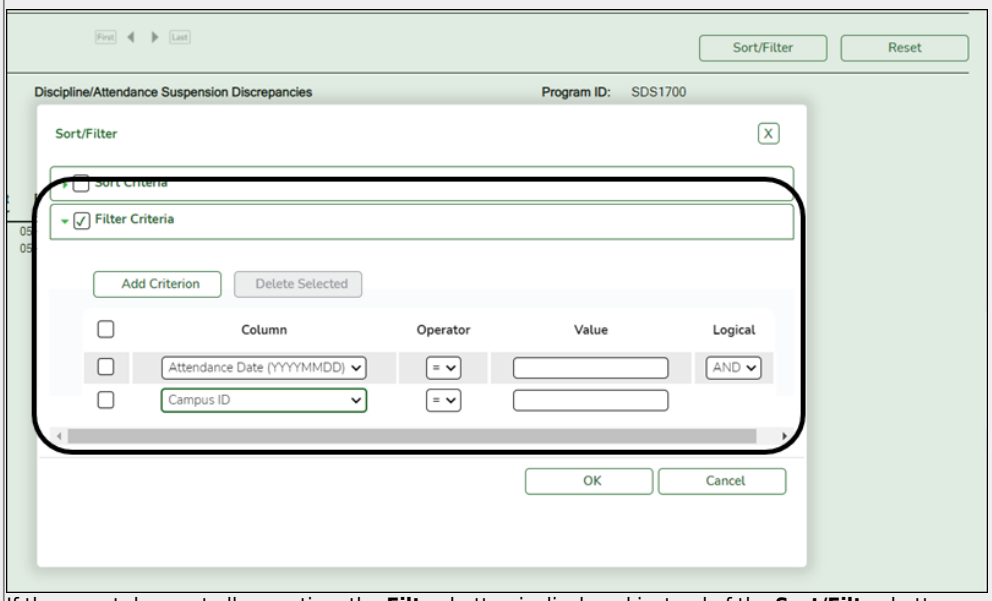

Click **Cancel** to close the window without re-sorting.

Filter Filter report data.

Filter

When you want to view only certain data, you may find it useful to filter the report data. You can use specific criteria to retrieve only the data that you want. Not all reports allow this option.

From the report window, click **Sort/Filter** to open the Sort/Filter window. By default, the **Sort Criteria** section is expanded. Click **Filter Criteria** to expand the **Filter Criteria** section.

If the report does not allow sorting, the **Filter** button is displayed instead of the **Sort/Filter** button, and sort criterion fields are not available.

Click **Add Criterion** to add new filter criteria. A blank row is added to the grid.

Column	Select a field by which to filter the data. The drop down lists the columns that appear on the report.
Operator	Select an operator. = Equals ≠ Not equals › Greater than ≥ Greater than or equal to ‹ Less than ≤ Less than or equal to
Value	Type the value by which you want to filter. For example, if you selected a date in the **Column** field, type a date to view only data for a specific date. **Note:** When filtering report data by date, you must use the following formats: • If the date is displayed in the MM/DD/YYYY format, the filter value must be in the YYYYMMDD format. • If the date is displayed in the MM/YYYY format, the filter value must be in the YYYYMM format. • If the date is displayed in the MM/YY format, the filter value must be in the YYMM format.

Add Criterion	Add another row. Select the logical connector (*AND* or *OR*) in the **Logical** field. Continue adding rows as needed. The **Logical** field does not appear until you click **Add Criterion** to add an additional row. • Using the AND operator limits search results, because the program looks only for records that contain both criterion. • Using the OR operator expands search results, because the program looks for records that contain either one criterion or the other, or both.
Delete Selected	Delete selected row. Select the row, and then click the button. The row is deleted from the filter criteria.

Click **OK** to apply the selected filter criteria to the report.

Click **Cancel** to close the dialog box without applying a filter.

NOTE: Some applications allow you to filter by specific data:

In Test Scores, you can filter report data to include only students who are enrolled in special programs. When filtering report data for At Risk, PRS, and GT programs, you must select 1 (Yes) or 0 (No) in the **Value** field. For example, if you filter report data for the At Risk program by selecting *Equals* in the **Operator** field and *Yes* in the **Value** field, no data is displayed; however, if you select *1* in the **Value** field, the At Risk data is displayed.

Reset	Reset report data. Click to restore the report to the original view, removing all sorting and filtering that has been applied.
