SCH2500 - Schedule of Classes (Next Yr)

Table of Contents

SCH2500 - Schedule of Classes (Next Yr)

Scheduling > Reports > Scheduling Reports > Post-Load > SCH2500 - Schedule of Classes (Next Yr)

The report provides a chart of courses scheduled for next year and the instructors who will be teaching the courses.

If the report is printed for all campuses and those campuses have course sections created, the maximum number of periods available in the district is displayed. You can print the report for one campus to obtain only specific periods.

Notes:

If the report fails, no data displays or one or more instructor is not included, make sure of the following:

There are no blank or non-numeric entries in Prd Beg or Prd End for the course section meeting times in Scheduling > Maintenance > Master Schedule > Campus > Section.

There is no apostrophe in the course title in Scheduling > Maintenance > Master Schedule

District > Courses.

The report will display up to 18 periods based on the campus Period Begin and Period End on the Maintenance > Master Schedule > Campus > Campus Control tab. If more than 18 periods are taught at a campus, the first 18 periods will display on the report.
