

Student Objectives

Table of Contents

Student Objectives 1

Student Objectives

Special Education > Maintenance > Student Sp Ed Data > IEP > Student Objectives

This tab allows you to add objectives to a student's IEP. The objectives are from a list created by the district on the Maintenance > District > IEP Goals Objectives > Performing Objectives tab.

The student is expected to achieve the objective in order to accomplish the goal.

Each goal is associated with a series of performing objectives, and each performing objective is associated with a series of enabling objectives.

Before you can add an objective, a goal must be selected on the Student Goals tab.
