Table of Contents

scrollBars	i
-------------------	-------	----------

By default, the assignment grades grid has its own scroll bars that work independently of the page. As data is added to the table, you may need to use the scroll bars to view the entire table.

The independent scroll bars are displayed *or not displayed* according to your setting for the **Use Independent Scroll Bars on Assignment Grades** field on your Update Profile page. If the field is selected, the table will have vertical and horizontal scroll bars that are independent of the page scroll bars. Otherwise, the table will not have independent scroll bars, and you must use the page scroll bars if the data exceeds one screen.

The independent scroll bars are not available on mobile devices.
