rubric_setup_intro i

This page allows you to create rubric charts that can be used for grading assignments. A rubric chart is a set of criteria (i.e., skills) used for assessing a student's work or performance and includes levels of potential achievement (i.e., scores) for each criterion.

Once a rubric is created, you can associate the rubric chart with an assignment on [Settings > Administer Assignments](#). Then, the rubric will be available for the assignment on [Grades > Assignment Grades](#).

This page is only available if enabled by the campus.
