Manage Rubric Charts 1

Manage Rubric Charts

Settings > Manage Rubric Charts

This page allows you to create rubric charts that can be used for grading assignments. A rubric chart is a set of criteria (i.e., skills) used for assessing a student's work or performance and includes levels of potential achievement (i.e., scores) for each criterion.

Once a rubric is created, you can associate the rubric chart with an assignment on [Settings > Manage Assignments](#). Then, the rubric will be available for the assignment on [Grades > Assignment Grades](#).

The rubric opens on the right side under **Editing Rubric: {Rubric Name}**, where {Rubric Name} is the name you entered.

Under **Editing Rubric: {Rubric Name}**:

A grid is displayed allowing you to enter criteria (i.e., skills) and scores for each criterion.

Add **Skills**:

Manage Rubric Charts

To add skills to the rubric chart, type the first skill name, up to 50 characters, and click **Add Skill**. The skill is added to the grid, and a blank field is displayed allowing you to add another skill.

The screenshot shows the 'Add Score' interface. At the top, there is a blue button labeled 'Add Score'. Below it is a section titled 'Scores' with a large empty input field. To the right of this field are two smaller input fields labeled 'Low Points' and 'High Points', both containing the number '0'. Below the 'Scores' section is a yellow highlighted section titled 'Skills'. Inside this section, there is a single skill entry: 'Organization' in a rounded rectangular box. Below the 'Skills' section is a blue button labeled 'Add Skill' with a red arrow pointing to it from the right. To the right of the 'Add Skill' button is the text 'Total Points: 0' and a blue button labeled 'Save'.

Continue adding skills as needed.

The screenshot shows the 'Add Score' interface after adding five skills. The 'Skills' section is highlighted in yellow and contains five entries, each in a rounded rectangular box with a small 'x' icon to its left: 'Organization', 'Focus and Detail', 'Sentence Structure, Grammar, and Spelling', 'Word Choice', and 'Citations'. The 'Scores' section at the top remains empty, with 'Low Points' and 'High Points' still showing '0'. The 'Add Skill' button is now disabled (greyed out), and the 'Total Points: 0' and 'Save' buttons are still visible at the bottom.

Add **Scores**:

Each rubric chart must have at least one column under **Scores**.

Establish a set of score names. For example, you could create the following set of five score names: Not Attempted, Below Average, Average, Above Average, and Exceeds Expectations.

To add a score, type the first score name (e.g., Not Attempted), up to 50 characters, and then click **Add Score**. The score is added to the grid, and a blank field is displayed allowing you to add another score.

The screenshot shows the 'Add Score' interface. At the top left, there is a blue button labeled 'Add Score' with a red arrow pointing to it. Below the button is a 'Scores' section with a yellow button labeled 'Below Average'. Underneath this button are two input fields: 'Low Points' and 'High Points', both containing the number '0'. Below the 'Scores' section is a 'Skills' section with two rows. The first row has a skill named 'Organization' and an empty input field. The second row has a skill named 'Focus and Detail' and an empty input field.

Continue adding scores as needed.

The screenshot shows the 'Add Score' interface with a grid of four scores. The 'Scores' section contains four yellow buttons: 'Below Average', 'Average', 'Above Average', and 'Exceeds Expectations'. Each button has a close icon (X) in the top right corner. Below each button are two input fields: 'Low Points' and 'High Points', both containing the number '0'. Below the 'Scores' section is a 'Skills' section with one row containing the skill 'Organization' and four empty input fields corresponding to the four scores.

Enter **Low/High Points**:

For each score, use the **Low Points** and **High Points** fields to establish a range of possible points within each score. Or, you can assign a single point value for each score.

The fields can have up to three digits.

Add Score								
Scores								
	Below Average		Average		Above Average		Exceeds Expectations	
	Low Points	High Points	Low Points	High Points	Low Points	High Points	Low Points	High Points
Skills	1	6	7	12	13	18	19	20
Organization								

Example 1 (with score ranges):

Within each score, you can establish a range of possible points:

The *Not Attempted* score may have **Low Points** and **High Points** both set to 0, because 0 points would be awarded if the student did not attempt the skill.

The *Below Average* score may have **Low Points** set to 1, and **High Points** set to 10, so a student who performed below average on the skill can earn between 1 and 10 points.

The *Average* score may have **Low Points** set to 11, and **High Points** set to 20, so a student who had average performance on the skill can earn between 11 and 20 points.

The *Above Average* score may have **Low Points** set to 21, and **High Points** set to 30, so a student who had above average performance on the skill can earn between 21 and 30 points. The highest score a student could receive would be 30.

The *Exceeds Expectations* score may have **Low Points** set to 31, and **High Points** set to 40, so a student who had above average performance on the skill can earn between 31 and 40 points. The highest score a student could receive would be 40.

In this example, if 10 skills were scored, the student could earn a maximum of 400 points for the assignment.

Example 2 (without score ranges):

To assign a specific number of points to each score, type the number of possible points in the **Low Points** field and leave the **High Points** field blank. When you save, the **High Points** field will automatically be set to the value in the **Low Points** field.

The *Not Attempted* score may have **Low Points** set to 0, because 0 points would be awarded if the student did not attempt the skill. Leave **High Points** set to 0 or blank.

The *Below Average* score may have **Low Points** set to 1, because 1 point would be awarded if the student had below average performance for the skill. Leave **High Points** set to 0 or blank.

The *Average* score may have **Low Points** set to 2, because 2 points would be awarded if the student had average performance for the skill. Leave **High Points** set to 0 or blank.

The *Above Average* score may have **Low Points** set to 3, because 3 points would be awarded if the student had above average performance for the skill. Leave **High Points** set to 0 or blank. The highest score a student could receive would be 3.

The *Exceeds Expectations* score may have **Low Points** set to 4, because 4 points would be awarded if the student had above average performance for the skill. Leave **High Points** set to 0 or blank. The highest score a student could receive would be 4.

In this example, if 10 skills were scored, the student could earn a maximum of 40 points for the assignment.

Enter a score note:

(Optional) For each skill, type a note about the score as it relates to the specific skill, up to 255 characters. The note is used to further clarify the requirements for awarding points for the skill.

Add Score				
Scores				
	<input type="text" value="Below Average"/> Low Points: 1	<input type="text" value="Average"/> Low Points: 7	<input type="text" value="Above Average"/> Low Points: 13	<input type="text" value="Exceeds Expectations"/> Low Points: 19
	High Points: 6	High Points: 12	High Points: 18	High Points: 20
Skills	<input checked="" type="checkbox"/> Organization The essay lacks a clear introduction, body, and conclusion.	The introduction states the main topic. A conclusion is included.	The introduction states the main topic. The body is developed. A conclusion is included.	The introduction is inviting and states the main topic. Information is relevant and presented logically. The conclusion is strong.

See [Notes on Special Characters](#) and [Copy/Paste From Other Documents](#).

TIP: You can expand the size of the fields by dragging the bottom-right corner of the field to the desired size. When you save the note, the field will return to its original size.

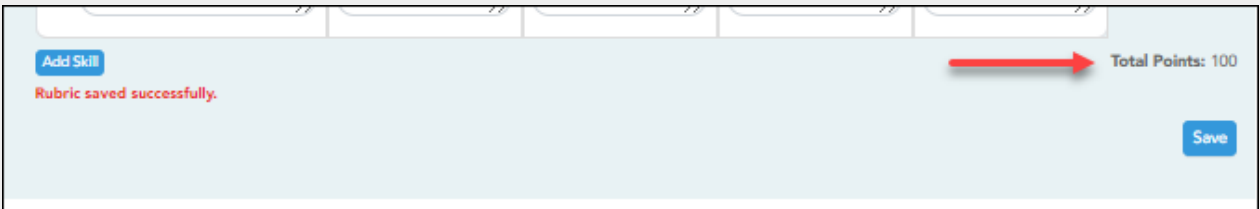

Scores must be entered in ascending order from left to right.

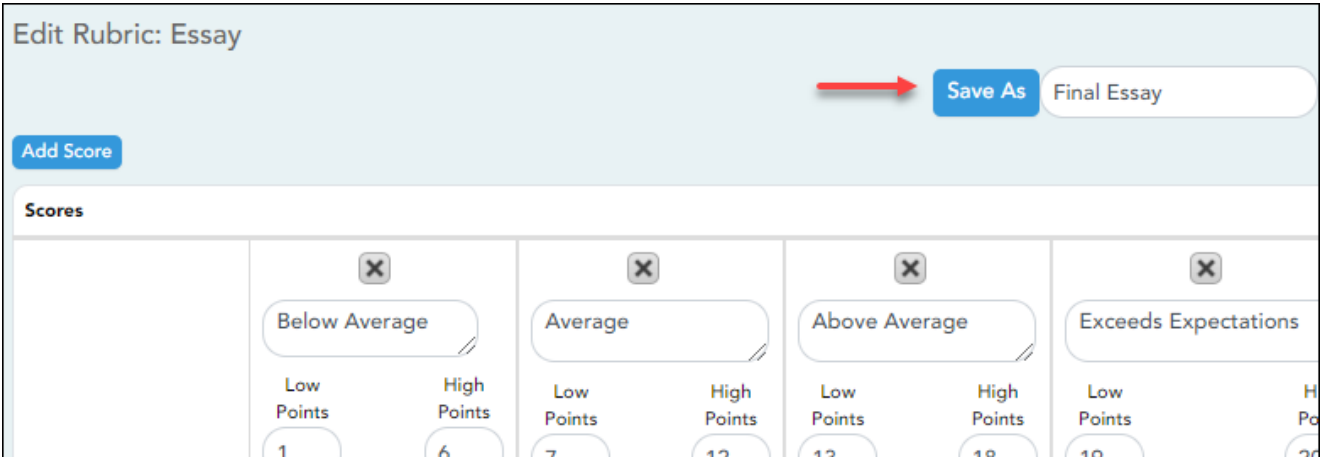

Scores cannot be out of sequence; however gaps can exist.

Click **Save**.

Total Points The highest possible number of points a student can earn for this assignment is calculated and displayed in the bottom-right corner. The number changes every time you save changes that affect the total possible points for the rubric chart.

To save a copy of the displayed rubric chart with another name (e.g., to use the rubric chart as a template for another rubric chart), type the new name in the field next to the **Save As** button, then click **Save As**.

The new rubric chart is added to the **Available Rubrics** list. The new rubric chart can be modified as needed.

Edit a rubric chart:

Under **Available Rubrics** (left), click  for the rubric chart you want to change.

The rubric chart opens under **Editing Rubric** (right). Modify the chart as needed, and then click **Save**.

NOTE:

If you attempt to edit a rubric chart that is in use, a message is displayed indicating the number of assignments using the rubric chart; however, you are not prevented from modifying some parts of the rubric chart:

- The skills cannot be changed.
- You cannot add a skill; the **Add Skill** button is not displayed.
- You must keep at least one column under **Scores**.
- The score note field can be modified.
- You can add scores, but you must maintain the same **Total Points**.

Delete a rubric chart:

Under **Available Rubrics** (left), click  to delete an existing rubric chart.

You are prompted to confirm that you want to delete the rubric chart. Click **OK**.

NOTE: You cannot delete a rubric chart that is in use (i.e., associated with any assignment).

Print the rubric chart:

Click **Print** to print a report of the displayed rubric chart.

The [Rubric Report Selection](#) page opens allowing you to make selections for printing the report.

This report prints a rubric chart which has been set up on [Settings > Manage Rubric Charts](#). You can print only the rubric chart (i.e., blank), or you can print the rubric chart with student grades for a particular assignment.

Specify report options:

Rubric Name	Select the rubric chart you want to print. Only rubric charts that have skills and scores already set up are listed.
Title	(Optional) Type a title for the report, up to 50 characters. If blank, the rubric chart name is used as the title.

Print with grades	<p>Select to print the report with student grades. This field is only displayed if the selected rubric chart has already been used to grade an assignment.</p> <p>If selected, an additional field is displayed allowing you to select a course-section. Only course-sections that have a rubric chart set up are listed.</p>		
course-section		<p>Once you select a course-section, another field is displayed allowing you to select the assignment that was graded with a rubric chart.</p>	
	assignment	<p>Once you select an assignment, a list of students in the course-section is displayed, along with their grade for the assignment.</p>	
		This Student	<p>Select for the students you want to print the rubric for. You can select Check all at the top of the column to select all students in the course-section.</p>

Click **Generate**.

- The report opens in a new window, and you can print the report from that window.
- The report selection page remains open on your desktop.
