Admin Guide: Leave Requests Setup

This guide provides the necessary steps to set up Security Administration and Payroll in order to take complete advantage of the benefits associated with using the leave request feature in EmployeePortal.

This guide assumes you are familiar with the basic features of the ASCENDER Business system and have reviewed the [ASCENDER Business Overview guide](#).

Prerequisites

- ☐ Ensure that all employees are set up with a user name and password, and can log on to EmployeePortal. If not, review the [Employee Guide: Create Account & Login](#) guide for additional information about user setup.

Set up Supervisor Profiles

Before an employee can be set up as a supervisor, approver, or temporary approver, the employee must have a security user profile.

1. [Create a demographic record](#).

[Personnel](#) > [Maintenance](#) > [Staff Demo](#) > [Demographic Information](#)

- ☐ Create an employee record. The record cannot be a non-employee record created in District Administration.
- ☐ Add an email address to the employee record to allow the supervisor or temporary approver to receive automatic reply and workflow emails.

2. Create a security profile.

Security Administration > Manage Users

☐ Update the user's profile with the employee number that was generated on the employee's Personnel demographic record.

☐ If the employee has an existing user profile, ensure that the profile is active (i.e., not marked as deleted in Security Administration).

3. Designate the employee/direct supervisor relationship.

This setting serves two purposes, it determines the leave request approval path for the employee and allows the supervisor to access the Supervisor menu in EmployeePortal.
