# Export Asset Management Tables - BAM7100

## ***Asset Management > Utilities > Export Asset Management Tables***

This utility is used to export a copy of all current asset management tables prior to running major functions. When exporting asset management tables, copies of the asset management data for the logged-on file ID are exported to the archive file located at a destination that you assign.

### **Export asset management tables:**

| Field                   | Description   |
|-------------------------|---|
| <b>Export File Name</b> | The export file name is displayed and has the format dbccddddd_mmddyyyyy_bam.rsf, where cccddd is the county-district number and mmddyyyyy is the current date. |

Click **Execute**.

### **Other functions and features:**

|  |   |
|--|---|
|  | <a href="#">Delete a row.</a><br>Click to delete a row. The row is shaded red to indicate that it will be deleted when the record is saved. |
|--|---|
