# Export Asset Management Tables - BAM7100

## Asset Management > Utilities > Export Asset Management Tables

This utility is used to export a copy of all current asset management tables prior to running major functions. When exporting asset management tables, copies of the asset management data for the logged-on file ID are exported to the archive file located at a destination that you assign.

### Export asset management tables:

Field	Description
<b>Export File Name</b>	The export file name is displayed and has the format dbccddd_mmddyyyy_bam.rsfl, where cccddd is the county-district number and mmddyyyy is the current date.
