## Finance > Tables > Bank Codes > EFT

This tab is used to create the record for a vendor's EFT payments to their bank. This function is accomplished by creating an EFT file during a payment run. This file is then given to the local education agency's (LEA) bank to be transmitted to an automatic clearinghouse. The automatic clearinghouse is normally a centralized federal reserve bank that transmits necessary data for electronically transferring funds to the vendor's participating depository financial institution (DFI).

### Set up an EFT code:

Field	Description
<b>Immediate Destination</b>	Type the nine-digit Federal Reserve routing number used to identify the receiving point. This number is provided by the individual bank. The field length is ten digits, since some banks require a leading space before the nine-digit routing number. If you type the nine-digit routing number and later need to add a space before the number, you must do the following:  Change the field to a random number (e.g., 123456789).  Click <b>Save</b> .  Add a leading space with the appropriate nine-digit routing number following the space (e.g., [space]987654321).  Click <b>Save</b> again. Only follow these steps when you need to add a space before a number that was previously saved.
<b>Company ID Type 5</b>	Type the ten-digit code used to identify the district. This is either the employer identification number with a 0 added on the end of the number or a leading 1, depending on the vendor's bank.
<b>Originating DFI ID Code</b>	Type the eight-digit code used to identify the originating DFI. This is the LEA's bank routing number without the last digit.
<b>Company ID Type 8</b>	Type the ten-digit code used to identify the LEA. This is either the employer identification number with a 0 added on the end of the number or a leading 1, depending on the vendor's bank.
<b>Employer Offset Account</b>	Type the offset account number used to debit the LEA's bank account. This number is the LEA's payroll bank account number, and will be included in the EFT file. Leave blank to exclude debits from the EFT file.
<b>Immediate Origin</b>	Type the ten-digit code used to identify the EFT sending point. There is a leading space plus the routing number for the LEA's bank.
<b>Originator Status Code</b>	
<b>Bank Code</b>	

Click **Save**.

\*\*NOTE:

**Other functions and features:**

 <a href="#">Delete a row.</a> Click to delete a row. The row is shaded red to indicate that it will be deleted when the record is saved.
