Default to PEIMS Codes - FIN7700

Finance > Utilities > Default to PEIMS Codes

This utility is used to create the required account code tables for a new district from previous PEIMS records. If a current account codes table exists, the system notifies you that codes exist and will not overwrite the existing tables.

Create account code tables:

Field	Description
Default to PEIMS Codes	Select to verify that you want to start the Default to PEIMS Codes utility process, you must select Default to PEIMS Codes.

Under **Default Obj.Sobj**, complete the object and subobject codes for each of the following fields:

Budget Fund Balance (e.g., 3700.00)
Actual Fund Balance (e.g., 3600.00)
Interfund Due From (e.g., 1261.00)
Interfund Due To (e.g., 2177.00)

Click **Execute**. You are prompted to continue copying the data from PEIMS to Finance.

Click **Yes** to continue or **No** to cancel.
