## Finance > Utilities > Extract to Asset Management

This utility is used to extract records from the Check Transactions file with an object/subobject code that matches an item in the Asset Management Cross-Reference table. Individual items from the file can then be retrieved into the Asset Management application. The extract file is only available in text format, even though the CSV icon is displayed.

### Create an asset management extract file:

Under **Create Asset Management Extract File from**, select one of the following:
