Add or update staff insurance data

[Personnel](#) > [Maintenance](#) > [Staff Demo](#) > [Insurance](#)

Use this tab to create and maintain health insurance plan data, covered individuals, and coverage dates for each employee record.

If this data is maintained throughout the calendar year, you can extract this data to the 1095 forms. While most data will populate accurately, there are some records that may require manual edits.

Since ACA is reported over a calendar year, some employees may have multiple rows if they changed insurance companies during the last enrollment period and you added insurance codes for each plan.

Retrieve an existing record

Begin typing the employee name or number. As you type the data, a drop-down list of corresponding data is displayed. Select an employee and click **Retrieve**. Or, click **Directory** to perform a search in the [Employees Directory](#).

Note: The employee autosuggest field includes employees whose records were created in Personnel but do not have a Pay Info or Job Info record. If the employee number does not exist in the system, a message is displayed prompting you to create a new employee. Click **Yes**.

☐ Click **+Add** to add a row.
