## Create credit card transactions

After the above steps are completed, you can use one of the following three methods to create credit card transactions.

### 1. Create a requisition in Purchasing

[Purchasing > Maintenance > Create/Modify Requisition](#)

Create a requisition.

- In the **Credit Card Code** field, press the SPACEBAR to view a list of credit card codes tied to your user profile. Select the appropriate credit card code.

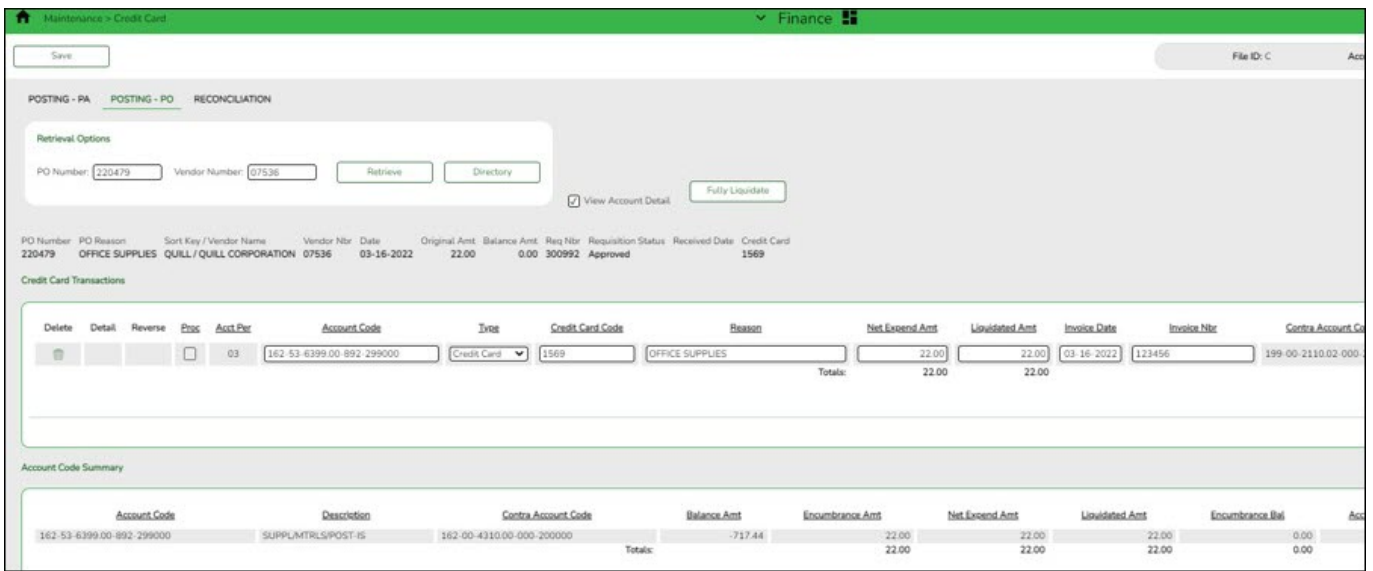

**Reminder:** The vendor selected on the requisition is the vendor that is being paid with the credit card, not the credit card company.

Soft encumbrance:

162-53-6399-00-892-299000	Debit	
162-00-4310-01-000-200000		Credit

**Post the payable transaction:**

[Finance > Maintenance > Credit Card > Posting - PO Tab](#)

After the requisition is approved, retrieve the PO to post or create the payable transaction (credit card transaction).

- The contra account is the credit card account from the credit card table even though it is different from the purchasing fund. This means that due to/due from accounts will be created to complete the accounting transactions.

Encumbrance liquidation:

162-53-6399-00-892-299000		Credit

Retrieve the PO to post the payable transaction (credit card transaction). Since this transaction was created without selecting a credit card code, a message is displayed as a reminder. On this tab, a credit card transaction is entered similarly to the [Finance > Maintenance > Postings > Check Processing - PO](#) tab.

- In the **Type** field, select the type of credit card transaction (*Purchase* or *Return*).
- In the **Credit Card Code** field, select the credit card code for the card used.
