EFMLEA Leave Day Examples

Example 1

- Previously processed leave days: 15 days
- Leave days in selected pay date: 12 days
- Total leave days = $15 + 12 = 27$ (This number is greater than 10 so payment is due.)
- The previously processed number of leave days is greater than 10 so the previously processed number of days is used in the days to pay calculation.
- Days to pay = $27 - 15 = 12$

Example 2

- Previously processed leave days: 2 days
- Leave days in selected pay date: 12 days
- Total leave days = $2 + 12 = 14$ (This number is greater than 10, payment is due.)
- The previously processed number of leave days is less than 10 so 10 is used in the days to pay calculation.
- Days to pay = $14 - 10 = 4$

Example 3

- Previously processed leave days: 1 day
- Leave days in selected pay date: 5 days
- Total leave days = $1 + 5 = 6$
- Less than 10 days; no days to pay
