Complete the accrual calendar

Log on to the current year pay frequency.

Payroll > Tables > Accrual Calendars > Accrual Calendar

Review the pay dates and accrual days for all applicable accrual codes **only if applicable** for July contracts. This may be necessary if you accrue employees working longer than 10 months (e.g., 11-month employees). The total number of days should equal the number of days employed for that group of employees.

The screenshot shows the 'ACCUAL CALENDAR' interface. At the top, there is a 'Save' button. Below it, the title 'ACCUAL CALENDAR' is displayed with 'Retrieve' and 'Print' buttons. The interface is divided into two main sections. The left section contains a table with columns: 'Delete', 'Details', 'Accrual Code', and 'Total Days Worked'. The right section contains a table with columns: 'Delete', 'Pay Date', and 'Days Worked'. Both tables have an 'Add' button at the bottom.

- For August, start with your accrual run date (08-31-20XX) and enter the August workdays.
- Continue adding pay dates and days worked for the remainder of the school year. The dates must equal the dates in your pay dates table. All pay dates should be entered even if zero days are accrued for that month. This information is LEA-specific.

Note: For a standard 187-day calendar in a monthly pay frequency, there should be 13 entries including the date for the August Accrual process and the 12 pay dates including the months that may have zero workdays.
