Date or Latest Re-Employ Date. If an employee does not have an employment date or if the employee has a termination date that is greater than their latest employment date, then the employee is not included in the Instructor directory.</p>
Latest Re-Employ Date	<p>Type the date the employee began his current period of employment in the MM-DD-YYYY format. The field applies only to employees who worked for the LEA, left the LEA, and then returned. If the employee never left the LEA, the field is left blank.</p>
Termination Date	<p>Type the date that the termination of the employee went into effect in the MM-DD-YYYY format. This field is used only for employees who have been terminated from their positions. For a non-contract employee, the percentage can be determined as follows.</p> <p>Example: The standard workday for the LEA is 7 hours. An employee is hired to work for 4 hours per day. This data element is coded as 057 for the employee because $4/7 = .571$ is rounded down.</p> <p>Employees such as cafeteria workers and bus drivers who work only a few hours each day should not be reported as 100 in this field. Consider the number of hours worked in relation to the standard LEA workday, not the job. The field can be a maximum of three digits.</p>

This data is part of the StaffEducationOrgEmploymentAssociationExtension complex type collected in PEIMS Submission 1.

Professional and paraprofessional staff may also be reported with an Auxiliary Role ID if they serve the LEA in a non-professional or non-paraprofessional role. A classroom teacher (Role ID 087) who also drives a bus route for the school would require an Auxiliary Role ID to be reported. In this case, the employee would have at least two payroll accounting entries: one with object code 6119, and one with object code 6129. Because there may be duplication between Role ID and Auxiliary Role ID, the LEA must use its discretion in determining if the employee is serving in a professional or non-professional capacity.
