What happens?

A complete copy of the current employee record is moved to the next year. Employees can be inactivated or activated when copying to the next year and those with termination dates can also be included in the copy process. When copying, you can change the fiscal year in distribution as well as the remaining deductions in the employee master record. If you update the number of remaining deductions, all deductions on the employee Deduction tab are updated to the designated default value. Be careful of deductions that should not be activated for the next year and those that the number of remaining deductions should be different from the default value and perform any necessary cleanup. The **Payroll > Utilities > Mass Update** tabs can be used to modify remaining payments for deduction codes.

If this process is performed multiple times for employees without deleting their NYR records, the system either updates or inserts distribution records from CYR to NYR and cleanup may be necessary.

Employees in the next year must be active to extract distribution information to Budget. If you do not activate employees when copying to next year, you can activate them when you perform a mass update.
