Correct out-of-balances

Log on to file ID C.

[Finance](#) > [Utilities](#) > [Out of Balance Correction](#)

In the current file ID (soon to be historical file ID), correct any out-of-balance occurrences. If there are no out-of-balance occurrences, continue to the next step.

This utility is designed to locate out-of-balance accounts in the End-of-Month (EOM), current, and next accounting periods.

If out-of-balance accounts exist, the [FIN1600 - Batch Process Balance Error Listing Report](#) is displayed with a list of the accounts. These out-of-balance situations may have been inadvertently caused by the system (e.g., missed transactions in the End-of-Month (EOM)). After processing the utility, the totals are recalculated and corrected in the general ledger.

IMPORTANT: The utility will not correct a true out-of-balance entry where a Fund Total is displayed in the General Ledger; those still need to be submitted for correction.

The ASCENDER processing logo is displayed upon accessing the page indicating that the program is searching for any out-of-balance accounts in the EOM, current, and next accounting periods.

If all accounts are in balance, the following message is displayed: All accounts for EOM, Current and Next Accounting Periods are in balance.

If any out-of-balance accounts exist for [YC](#), [AC](#), [AA](#), the [FIN1600 - Batch Process Balance Error Listing Report](#) is displayed with a list of the accounts. [Review the report.](#)
