Select Condition Codes

Table of Contents

Select Condition Codes

The Condition Codes lookup is used to select one or more condition codes.

Select a condition code:

- The condition codes are listed in ascending order.
- To search for a specific condition code, begin typing the condition code or description in the **Search** field. The list is automatically filtered to display the condition codes that contain the characters that you have typed.
- When you locate the condition codes to be included, select the corresponding checkbox and click **OK**. The lookup closes, and the field/parameter is populated with the selected codes.
- Click **Cancel** to close the lookup without selecting a condition code.
