Extra Duties - HRS3300

Human Resources > Maintenance > Hours/Pay Transmittals > Extra Duties

This tab is used to create the transmittals for the extra duties that are assigned to the employees and to track the pay associated with these assignments. Note that the transmittal records cannot be changed after a payroll has been run. This tab consists of a grid at the top and a free-form area at the bottom. Note: When entries are made on the Maintenance > Leave Account Transaction > Employee Substitute tab for the employee and the associated substitute, extra duty transmittals are automatically created for the substitute.

- If changes are made to the amount in the extra duty transmittal for the substitute and the pay date for the employee has not been processed, the amount changes the employee's leave transaction to reflect the change in the amount paid to the substitute.
- If the substitute used for the employee on the Maintenance > Leave Account Transaction > Employee Substitute tab needs to be changed or deleted and the employee's pay date has not been processed, change or delete the transaction from the Maintenance > Leave Account Transaction > Employee Substitute tab. The system changes or deletes the substitute transaction on the Extra Duty tab.
- If the employee's pay date has been processed and the substitute's extra duty transmittal needs to be changed, the system allows a change in the amount, but does not allow the transaction to be deleted. A negative transaction for the substitute for the same amount and accounts must be added to offset the transaction.
- If a transaction is added on the Extra Duty tab for the substitute, the Employee Substitute Report does not reflect the employee/substitute relationship, nor is the employee's pay reduced if docking by substitute amount is used.

Note: Entries on this page are processed when selecting Regular Payroll or Supplemental Payroll in the Run Payroll process. However, entries with a Y in the **Standard Gross Cd** field are not processed for a supplemental payroll.
