## Human Resources > Maintenance > PMIS Change in Position > Change in Compensation

This page is used to change the position(s) and compensation amount(s) currently assigned to an employee. Existing positions can be added or removed from employees, and existing supplements can be added or removed from existing employees. The page can also be used to fill a position with a new employee or to add an additional position to an existing employee.

When a change in compensation (CIC) transaction is approved, the previous job record will be updated with the payoff amounts and information, and a new job record will be inserted with the associated distributions. If the CIC is for a new hire, only the new information is inserted.

### Create a CIC transaction record:

Field	Description
