# Create/Modify Requisition - REQ3100

## Purchasing > Maintenance > Create/Modify Requisition

This page is used to edit existing requisitions, create new requisitions, and filter existing requisitions by from/to date or requestor. Originators can submit requisitions for multiple requestors.

You can only view the requisitions that you created. This feature ensures that a user only modifies his own requisitions.

- Requisitions created by originators with no approval path are automatically approved when saved, and a purchase order is created when the requisition is submitted.
- Requisitions created in the current accounting period that have all general journal transactions in the current accounting period are displayed in the current and the next accounting period.
- Requisitions created in the next accounting period that have all general journal transactions in the next accounting period are displayed in only the next accounting period.
- Requisitions created in the current accounting period that have general journal transactions in the next accounting period are displayed in only the next accounting period.
- Requisitions created in the current accounting period that have no general journal transactions (saved requisitions) are displayed in the current and the next accounting period.
- Requisitions created in the next accounting period that have no general journal transactions (saved requisitions) are displayed in the next accounting period only.

**Note:** If another user enters an account code for which the selected requestor is not authorized to use in his user profile, the account description is changed to Account Code Not In User Profile. Users can:

- Change the unauthorized account code to an account code in the requestor's user profile.
- Change the values in the Percent and Amount columns of the unauthorized account code.

Requisitions that are only saved are set to a Not Submitted status. When submitted, the requisition status to is set to Pending until it is approved (if required) and becomes a purchase order.

### Create or edit a requisition:
