Initialize Yearly Inventory Files - BWH6200

Warehouse > Utilities > Initialize Yearly Inventory Files

This page is used to reset all selected yearly inventory files for the selected warehouse ID.

Note: Please create an export using Finance > Utilities > Export Finance Tables prior to using this utility.

Initialize yearly inventory files:

Select one or more of the following **Options** to initialize:

Field	Description
Zero Reorder Level	Select to reset all reorder levels to zero. By default, this option is not selected.
Clear Last Restock	Select to reset all last restock dates. By default, this option is not selected.
Clear Last Requested	Select to reset all last requested dates. By default, this option is not selected.
Execute	Click to execute the process. When the Initialize Yearly Inventory Files utility is run, the **Used to Date** field is always reset to zero.

A message indicating that the initialization process completed successfully is displayed. Click **OK**.|
