Requisition Number - BWH6500

Warehouse > Utilities > Mass Reverse Pending Requisitions > Requisition Number

This tab is used to mass reverse pending warehouse and restock requisition records based on the selected requisition number. The requisitions are returned to the originator and set to a saved status. The account codes are deleted, and the workflow and workflow history are deleted. This process also reverses encumbrance general journal transactions created during the approval path process and updates the general ledger.

- All back orders are deleted, and the amount in Finance is reversed.
- The restock requisition reversal process is similar to the purchase order reversal process.
- Warehouse requisitions cannot be reversed when a shipping order is created but yet not printed yet.
- If the requisition accounting period is set for the current accounting period, only those requisitions created in the current and previous accounting periods are reversed.
- If the requisition accounting period is set for the next accounting period, only those requisitions created in the next accounting periods are reversed.
- If the requisition accounting period is set for the current accounting period and transactions exist in the next accounting period, those requisitions can only be reversed in the next accounting period.

Mass reverse pending requisition records by fund/fiscal year:

Under **Requisition Number Range**:

Field	Description
From	Type the beginning number of the range of requisitions to be deleted. The field can be a maximum of six digits.
To	Type the ending number of the range of requisitions to be deleted. The field can be a maximum of six digits.
