# TSDS Level 1 Errors - DA4550

## District Administration > Inquiry > TSDS Level 1 Errors

This page is used to view and print a listing of selected errors that occurred in various domains/entities when the API interface files begin processing into the TEA database. ASCENDER does not control the content of these errors.

### View and print errors:

A list of domains and entities is displayed along with the number of errors associated.

Select ☐ next to the domains (rows) to be included in the report. If multiple domains are selected, the report prints in dependency order (Domain > Entity), which is the same order used in the Ed-Fi error log.

Field	Description
<b>Domain</b>	Displays the Ed-Fi domain name where the error(s) occurred (e.g. Education Organization).
<b>Entity</b>	Displays the entity within the Ed-Fi domain where the error(s) occurred (e.g. LocalEducationAgency).
<b>Number of Errors</b>	Displays the number of errors that occurred within the entity.

☐ Click **Print**. The report is displayed with the error details as reported by TEA. The report includes key details for each entity within the domain; however, some endpoints may or may not be populated depending on the error.

**Note:** If included in the report, the **Action Type** column displays the expected action of the record that was sent to the Operational Data Store (ODS):

- **I** - Insert
- **U** - Update
- **D** - Delete
