This page allows you to change settings for a selected form, such as adding the fields to the form, assigning a “friendly” name, and determining the order in which the fields are displayed. This page can only be accessed by selecting a form from the Form Management page.

## Edit a form:

1. From the Forms Management page, select Forms from the menu. The Form Management page is displayed.
2. Under **Available Forms**, click  under **Options** for the form you want to manage.

Below are instructions for **New Student Enrollment Forms** and **All Other Dynamic Forms**, as well as **Static Forms** (scroll down). Standard forms cannot be edited or deleted.

## New Student Enrollment Forms

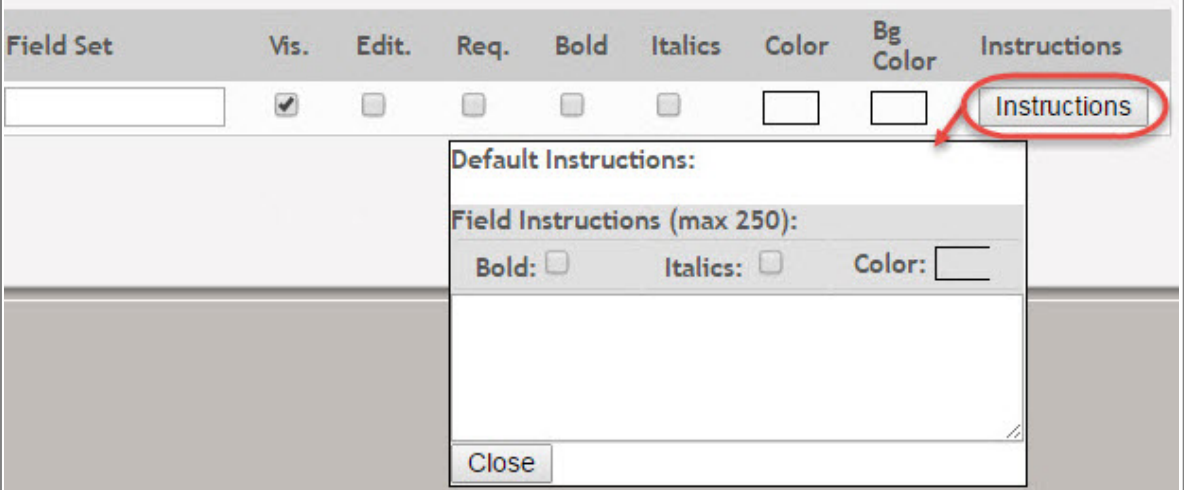

*New Student* forms are dynamic forms. Several *New Student* forms are included automatically and already have columns (i.e., fields) added. These forms cannot be deleted or renamed; however, you can modify some of the default settings for each form column.

The **Name**, **Campus**, **Editable**, and **Visible** fields display the default information and cannot be changed. These forms cannot be archived.

<b>Current Language Context</b>	Select the language of the form you are editing.
<b>Special Instructions or information for this form</b>	Type any specific instructions for the form, up to 2000 characters, in the selected language.

You cannot add columns to the form; the **Add** button is disabled. However, you can modify the following settings for existing columns:

<b>Friendly Name</b>	The default friendly name is displayed. If you selected <i>Spanish</i> for <b>Current Language Context</b> , the default friendly names are Spanish. Modify the name as needed, up to 50 characters. The name should be typed in the language selected in <b>Current Language Context</b> . If a Spanish name is not provided, the English name will be displayed even if the parent is viewing txConnect in Spanish.
<b>Order</b>	Indicate the order in which you want the fields to be displayed on the form. For example, type 1 if you want to field to be displayed at the top of the form.

<b>Field Set</b>	<p>Use this column to group related fields together in the form. For example, you could type "Mailing Address" for all fields that are related to the student's mailing address.</p> <p>The fields that you want to physically group together should also be together as indicated by the <b>Order</b> field. The fields with the same <b>Field Set</b> are grouped together in a box, but only if they are adjacent in the order. The box is drawn around one or more sequential fields that have a <b>Field Set</b> specified.</p> <p>The field set should be typed in the language selected in <b>Current Language Context</b>. If a Spanish field set name is not provided, the English field set name will be displayed even if the parent is viewing txConnect in Spanish.</p>
<b>Vis</b>	<p>Select if you want the field to be visible to parents on the form. Clear the check box if you do not want the field visible to parents. For example, you can hide the four-digit zip code extension. The setting of this field overrides all other visibility settings.</p>
<b>Edit</b>	<p>Select to allow parents to update data in this field from the form.</p> <ul style="list-style-type: none"> <li>• If selected, the form field will be editable, but only if the field is also set to <b>Updateable=true</b> on the <a href="#">Form Field Management</a> page.</li> <li>• If <i>not</i> selected, this will override the other setting, and the form field will not be editable.</li> <li>• This setting does not apply to <i>New Student</i> forms.</li> </ul>
<b>Req</b>	<p>Select if the field is required of the parents. If this field is selected, be sure <b>Edit</b> is also selected.</p>
<b>Instructions</b>	<p>Click the button to view any existing default instructions and add additional instructions for the field. A pop-up window opens.</p>  <p>Click <b>Close</b>.</p>

Click **Save**.

Click **< Forms** to return to the Form Management page.
