

ASCENDER GUIDES

Table of Contents

This page allows district-level users to create a template (i.e., set of forms) for student online registration.

Online Registration refers to forms required annually for students, which is not the same as Online Enrollment.

When Online Registration is enabled at the district, these forms will be displayed to parents when they are logged on to txConnect, and will have notifications indicating which forms are completed and which still require the parent's attention.
