ASCENDER Standards-Based Grading, Set-Up and Use

Standards-Based Grading is a system of reporting student proficiency as specific learning goals (i.e., standards). If a course uses standards-based grading, assignments are associated with one or more standards. The standards are grouped together into standard sets. An assignment may be associated with more than one standard, and may be associated with multiple standard sets.

With standards-based grading, a student's score may reflect the average for the standard, which is calculated by adding all scores for all assignments associated with the standard, and dividing by the number of assignments. Or, the student's score may be calculated using the Power Law computation. The higher of the two is displayed as the student's standard score unless the instructor has entered an override score. If an override score is entered, it is always displayed as the student's average.

The Power Law Computation is based on the idea that a student's later scores should have more weight than his earliest scores, because later scores are more reflective of the student's accumulated knowledge. See the Power Law Computation chapter at the end of this guide for more information.

This guide covers the steps used by instructors to set up and use Standards-Based Grading.

Prerequisites

- This guide assumes you are familiar with the basic features of TeacherPortal and have reviewed the TeacherPortal guide.
- You must be a registered TeacherPortal user and be logged on to a campus that allows standards-based grading.
- Standards-based grading must already be set up at the administrative level before an instructor can set up courses.

Checklist Overview

The following steps are covered in this guide:

- Set up the course.
 - Designate a course as standards-based.
 - Select the standards for each course.

- Enter scores throughout the cycle.
- View a student's scores as needed.
- Print IPRs as needed.

Set Up a Standards-Based Course

[Designate a Course as Standards-Based](#)

Designate a Course as Standards-Based

The Manage Courses page allows you to set course-wide information, such as whether a course uses category-based (i.e., regular) or standards-based grading. Data entered on this page affects only the selected course section. You must specify a course as standards-based before continuing.

Settings > Manage Courses

Course-Section 04 CHEM RPT CTM (3852-41) ▼ Retrieve

Note will be visible in ParentPortal

PIN: Save

In the **Course Section** field, select the course section for which you want to add data. You must select a course that has been set up to allow standards-based grading, as described in the TeacherPortal Administrator - Set Up Standards-Based Grading “How To” guide.

In the **Assessment Type** field, select *Standards-Based Grading*.

- The field is only displayed if both the campus and the course are set up to use standards-based grading. It is not displayed if the campus has disabled the teacher’s ability to determine the assessment type for the course.
- You must continue to use the same assessment type for the remainder of the year. You

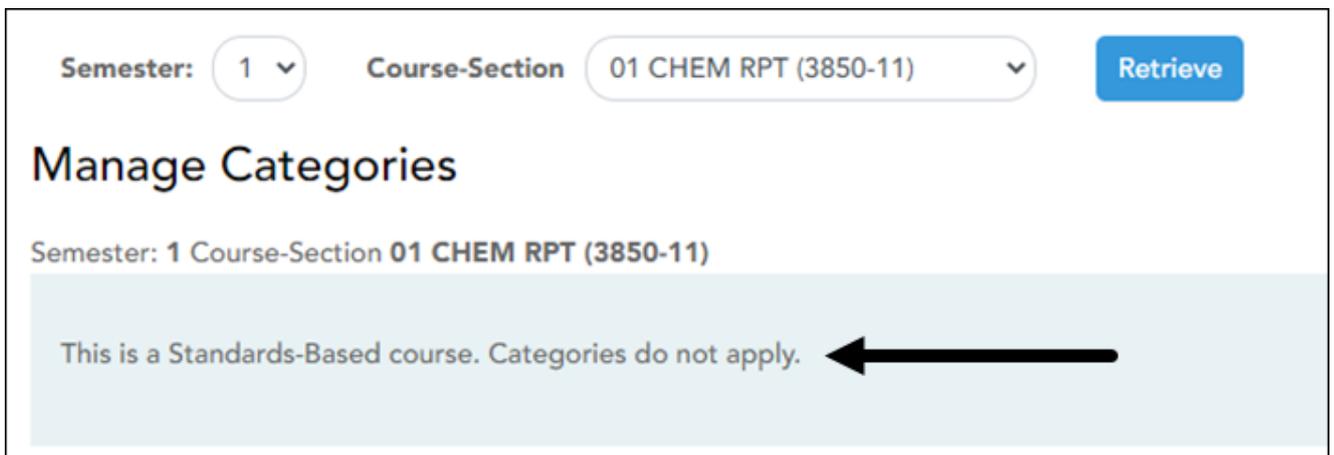

cannot use standards-based for only one semester.

Click **Save**

[Set Up Assignments](#)

Set Up Assignments

NOTE: Categories are not used for standards-based courses, so it is not necessary to set up categories on *Settings > Manage Categories* before entering assignments.

The screenshot shows the 'Manage Categories' interface. At the top, there are two dropdown menus: 'Semester' with '1' selected and 'Course-Section' with '01 CHEM RPT (3850-11)' selected. To the right of these is a blue 'Retrieve' button. Below the dropdowns is the title 'Manage Categories'. Underneath the title, the selected course information is displayed: 'Semester: 1 Course-Section 01 CHEM RPT (3850-11)'. A light blue message box contains the text 'This is a Standards-Based course. Categories do not apply.' with a black arrow pointing to the right.

The Manage Assignments page allows you to enter assignments for your active courses, including standards-based courses. Different fields are displayed according to the type of course selected.

In the **Date Assigned** field, enter the date the assignment was assigned.

- In the **Date Due** field, enter the date the assignment is due.
- In the **Notes** field, click the  to add optional notes for the assignment. If entered, these notes are displayed in ParentPortal.
- Click **Add new assignment** to add another assignment. Continue adding assignments as needed.
- To delete an assignment, Click  under **Delete**.
- Type the four-digit PIN and click **Save**. An assignment cannot be saved unless it has at least one standard associated with it.

Enter Grades for a Standards-Based Course

Grades for standards-based grading are entered on the Assignment Grades and Cycle Grades pages.

[Assignment Grades](#)

Assignment Grades

The standards-based Assignment Grades page allows you to enter standards-based scores for students by semester, cycle, and course section throughout the cycle. For each assignment, you enter scores for all associated standards, so an assignment will often have multiple scores. The scores are converted into a standard 100%-based (i.e., regular) grade for the course.

PIN: Save Calculate Averages

The standards-based Assignment Grades page is displayed if you select a course section that is using standards-based grading. The page is automatically displayed instead of the regular Assignment Grades page. If you change between a standards-based course section and a category-based (i.e., regular) course section, the appropriate page loads.

Select the semester, cycle, and course section, and click **Retrieve Data**.

By default, all assignments for all students are displayed. To view a specific set of information, make one or more of the following selections:

Semester: 1 Cycle: 1 Course-Section: 01 CHEM RPT (3850-11) Retrieve

Assignment Grades

Standard: All Standards Assignment: All Assignments Due Date: Student: All Students Show Withdrawn

Semester: 1 Cycle: 1 Course-Section: 01 CHEM RPT (3850-11) Valid Standards Score Range: 1 - 5

| Student ID | Student Name | Behavior Grade | Current Avg. | Lab safety Due:08/20/2021 | Scientific notation Due:08/25/2021 | SL and gas assessment Due:08/30/2021 | Phs vs Chem change assessment Due:09/01/2021 | Id. Families Per.Table Due:09/10/2021 | States & phys/chem properties Due:09/13/2021 |

| | | | | C.02G CHEMICAL QUANTITIES | C.02G CHEMICAL QUANTITIES | C.04C STATES OF MATTER | C.04A PHYSICAL/CHEMICAL PROPERTIES AND CHANGES | C.05B PROPERTIES OF CHEMICAL FAMILIES | C.04A PHYSICAL/CHEMICAL PROPERTIES AND CHANGES |
| 123456 | | 4.0 / 90.0 | 3.4 / 78.0 | 2.5 | 2.5 | 3.0 | 2.5 | 4.0 | 2.5 |

In the **Standard** field, select a standard to view data for only one standard. Or, select *All Standards* to view all standards associated with each assignment.

If you filter by a standard, the following applies:

- If an assignment has multiple associated standards, only the selected standard is displayed under the assignment heading.
- If an assignment is not associated with the selected standard, the assignment is not displayed in the grid.

In the **Assignment** field, select the assignment for which you want to enter scores. You can select one assignment or all assignments.

In the **Due Date** field, enter a date if you want to view only assignments that are due on or after that date.

In the **Student** field, select the student for whom you want to enter scores. You can select one student or all students.

The students and assignments are displayed according to your selections.

For each assignment, the associated standards are displayed as set up on Settings > Administer Assignments. Scores are entered for each standard, so an assignment may have multiple scores.

Semester: 1 Cycle: 1 Course-Section: 01 CHEM RPT (3850-11) Retrieve

When scores are entered or changed, the table cell turns grey to indicate that the score was changed but not yet saved. Once the scores are saved the cell is no longer grey.

Only numeric scores can be entered. However, the following codes can be entered in place of a score:

- I - Incomplete

The following codes can be entered as properties of the score entered:

- L - Late
- R - Re-do

HINT: Type and save the code first. Then add the score.

If you type one or more of these codes for a score, an icon is displayed when you click **Save** to indicate the properties associated with the score. The icon displays the code (I, L, or R).

NOTE: The code will be applied to all standards for the assignment, even though it is entered for one standard.

Code I can be updated with a numeric score as needed. However, you cannot remove codes L and R from the score field. Instead, you must open the Grade Properties dialog box from the Student Assignment Grades: Standards- Based page, update the properties, and save the changes.

Scores can be mass entered, mass excluded, mass replaced, or mass deleted. For more information, view the online Help for this page.

For more information about navigating the page, view the online Help for this page.

The **Behavior Grade** field displays the overall behavior score for the course section followed by the conversion grade (e.g., 4.5/90, where 4.5 is the student's total score, and 90 is the student's converted grade). The converted grade is based on the table entered in Grade Reporting on Maintenance > TeacherPortal Options > District > Stds-Based Conv Tbl. If the student does not yet have a working cycle behavior average, the field is blank.

The **Current Avg.** field displays the overall score for the course section followed by the conversion grade (e.g., 4.5/90, where 4.5 is the student's total score, and 90 is the student's converted grade). The converted grade is based on the table entered in Grade Reporting on Maintenance > TeacherPortal Options > District > Stds-Based Conv Tbl. If the student does not yet have a working cycle average, the field is blank.

The average is updated every time you access the page, click **Calculate Averages**, or save scores.

Semester: 1 Cycle: 1 Course-Section: 01 CHEM RPT (3850-11) Retrieve

Assignment Grades

Show Comment Legend

The **Average** column displays the current average, which is the same as the **Current Avg** field on Grades > Assignment Grades. Only the converted grade is displayed.

The final scores and calculated average are cumulative for the semester. The final score displayed is the highest score of the following:

- The student's current average for the standard, which is calculated by adding all scores for all assignments associated with the standard, and dividing by the number of assignments.
- The student's score as calculated using the power law computation.
- If an override grade is entered, the override grade is always displayed.

The final standard score reflects standard scores for all cycles in the semester, even though only one cycle is displayed at a time.

The average does not include scores of zero, unless zero is a valid grade for the campus.

View a Student's Scores

View a Student's Scores

The Student Assignment Grades: Standards-Based page allows you to view and enter a student's scores in a particular course section for a semester-cycle.

Grades > Student Assignment Grades

You can access the page from the Grades > Assignment Grades (standards-based) page. Retrieve a standards-based course, and then click a student's name. The Student Assignment Grades: Standards-Based page is displayed allowing you to view and enter a student's data.

The following data is displayed:

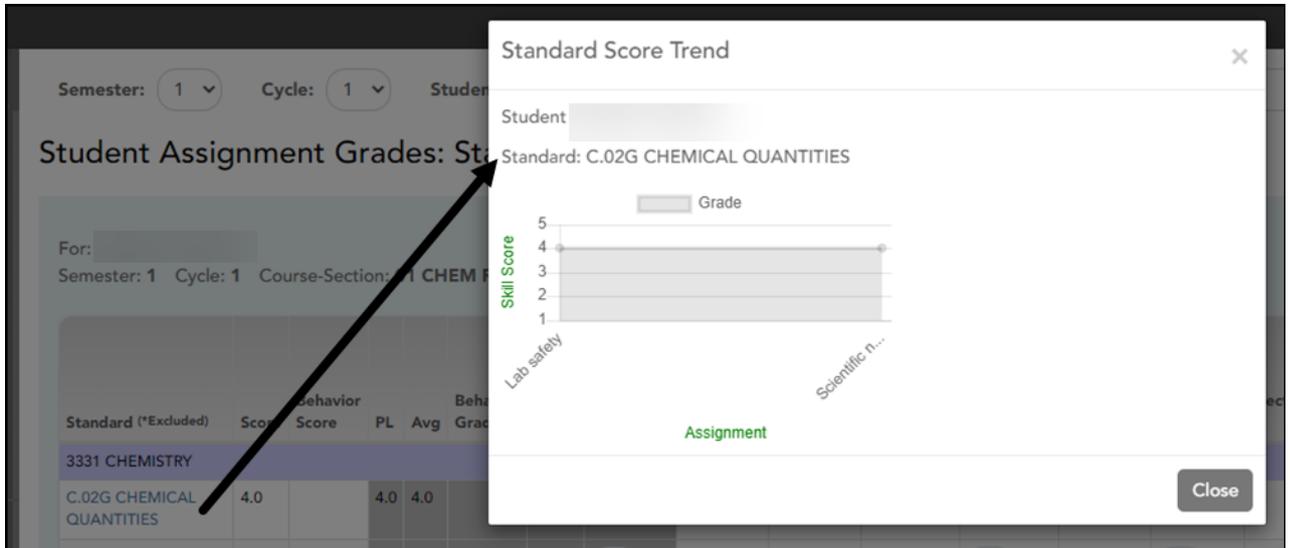

The student's data for the semester-cycle is displayed; however, standards and standard sets are listed if they were part of any of the student's assignment during the semester.

For example, a standard that was only assigned to an assignment is cycle 1 is displayed in the list for later cycles; however, the assignments and their related scores for previous cycles are not displayed.

Each assignment for the semester-cycle is displayed in a column. If a standard is assigned to the assignment during the cycle, an input field is displayed. Existing scores are displayed; otherwise, the field is blank. You can add or update the score fields.

The score must be within the range of the rubric grid, as defined by the district. You can enter whole numbers or a number with one decimal place (e.g., 3.5).

If you click a standard, the Standard Score Trend dialog box opens. This displays line chart depicting the student's progress for the standard. The vertical line represents the rubric scores as established by the district, and the horizontal line represents the assignments that are associated with the selected standard. The data is display only.

Click **Close** to close the dialog box.

The **Score** column displays the student's overall score for the assignment for all cycles in the semester. The score is either the higher score or the average (**Avg** column) and the power law average (**PL** column) or the override score if it exists. The override score is always displayed if it exists in any cycle in the semester.

The **PL** (power law) column displays the student's average for the assignment based on the power law formula, which is described later in this guide.

The **Avg** column displays the student's current average for the standard, which is calculated by adding scores for all assignments associated with the standard and dividing by the number of assignments.

NOTE:

The average displayed will reflect scores from all assignments associated with the standard, including previous cycles in the semester. For example, if it is currently cycle 3 of the semester and the standard was associated with assignments in cycles 2 and 3, the average will reflect scores for the entire semester, even though only cycle 3 is displayed.

The **Mode** column displays the mode if one exists. The mode is the standard score that appears most often for the semester to date. It is cumulative for the semester, not just the current cycle. There can be more than one mode.

NOTE:

- If all scores occur the same number of times, there is no mode, and the column is blank.
- If two or more scores are tied for most number of occurrences, (i.e., bi-modal or multi-modal), all will be displayed.

Examples:

- If the student's standard scores for the semester are 1, 2, 4, 2, the mode is 2.
- If the student's standard scores for the semester are 1, 1, 3, 2, 4, 2, the mode is 1,2.
- If the student's standard scores for the semester are 1, 2, 3, 4, there is no mode.

In the **Override** field, you can type an override score for the standard. If an override score is entered, it overrides the scores in the **PL** and **Avg** columns and it will always be displayed in the **Score** field.

- The override score must be within the range of the rubric grid, as defined by the district. You can enter whole numbers or a number with one decimal place (e.g., 3.5).
- If an override score was entered in a previous cycle in the semester, the score is carried over to the later cycles in the semester. However, if you enter an override score after cycle 1, it only applies to the current and later cycles for the semester.

NOTE:

If you want to dismiss an override grade for the entire semester, it must be cleared in all cycles of the semester.

For each standard set, the **Standard Set Score** row displays the average of all overall standard scores for each standard set.

- The average does not include scores of 0, unless a 0 exists in the rubric grid. It is rounded to one decimal place.
- This average is cumulative for all cycles in the semester.

The **Total Score** row at the bottom of the table displays the average of all Standard Set Scores.

The **Conversion Grade** row at the bottom of the table displays the standard 100%-based grade, which is a conversion from the **Total Score**. The conversion scale is determined by the district in the Student system.

The averages are updated every time you access the page, click **Calculate Grades**, or save the scores.

Comments and indicators can be entered for each assignment grade. For more information, view the online Help for this page.

Type a four-digit PIN and click **Save**.

To retrieve data for another semester-cycle or student, change the **Semester**, **Cycle**, **Student**, or **Course Section** fields.

To return to the standards-based Assignment Grades page, click **Back to the Assignment Grades**.

No Evidence Code Legend
A - No Evidence Absent RE - No Evidence Refusal T - No Evidence Transfer

The semester and cycle are displayed at the top of the IPR. However, the final scores and calculated average are cumulative for the semester.

For standards-based courses, the following is included on a student's IPR:

- **A - Conversion Grade:** This is the grade that appears on *Grades > Cycle Grades* in the **Average** column. It is the student's average to date. The average is cumulative for the semester, even though assignment grades are only displayed for the selected semester-cycle.

-
- B - Behavior Grade:** This is the behavior grade that appears on *Grades > Cycle Grades* in the **Average** column. It is the student's average to date. The average is cumulative for the semester, even though assignment grades are only displayed for the selected semester-cycle.
- C - Standard Set:** This is the set of standards with which the graded standard is associated.
- D - Standard:** This is the standard.
- E - assignment name:** This is the assignment with which the standard is associated. The grade for each assignment is displayed in the grade column. The assignment grades are displayed for the selected semester-cycle only.
- F - Final Score:** A final score is displayed for each standard. The score displayed is the highest score of the following:
- The student's current average for the standard, which is calculated by adding all scores for all assignments associated with the standard, and dividing by the number of assignments.
 - The student's score as calculated using the power law computation.
 - If an override grade is entered, the override grade is always displayed.
- G - Final Score (standard set):** A final score is displayed for each standard set. This is the average of all final scores for each standard. The final standard set score reflects standard set scores for all cycles in the semester, even though only one cycle is displayed at a time. The average does not include scores of zero, unless zero is a valid grade for the campus. The final standard set score is rounded to one decimal place.
- H - Total Score:** This is the average of all standard set final scores, which takes into account all cycles in the semester. This grade is converted to a standard 100%-based grade using a conversion chart established by the district (e.g., 3/80, where 3 is the student's total score, and 80 is the student's converted grade).

Power Law Computation

Power Law Computation

In standards-based grading, a student's standard score may reflect the average for the standard, which is calculated by adding all scores for all assignments associated with the standard, and dividing by the number of assignments. Or, the student's score may be calculated using the Power Law computation. The higher of the two is always displayed as the student's standard score, unless the instructor has entered an override score.

The Power Law computation is based on the idea that a student's later scores should have more weight than his earliest scores, because later scores are more reflective of the student's accumulated knowledge.

The nonlinear power law equation is $y = m \cdot x^b$, where:

- y is the score that is being predicted or computed.
- x is the score on which the prediction is based, indicating the number of practices the student has had for the standard. For example, if the student has had three assessments to date, starting with a homework assignment, then a quiz, and then a test, the x score for the homework assignment would be 1, for the quiz would be 2, and for the test would be 3. Each score must have a corresponding assessment number.

Steps:

- Calculate the log of x and the log of y for all possible x values and all possible y values.
- Use the log values for x and y in the linear equation $y = mx + b$ (i.e., $\log(y) = m \cdot \log(x) + b$).
- Solve for m in this linear equation to get the value for b for the nonlinear equation.

$$m = \frac{\sum xy - \left[\frac{\sum x \sum y}{N} \right]}{\sum x^2 - \left[\frac{(\sum x)^2}{N} \right]}$$

- Solve for b in this linear equation to get $\log(m)$. Calculate m using the formula $m = e^{\log(m)}$ to get the value for m in the nonlinear equation.

$$b = \frac{\sum y - m(\sum x)}{N}$$

- Use the new values for m and b in the nonlinear Power Law equation.
