SAT2200 - Membership Summary 1

SAT2200 - Membership Summary

Attendance > Reports > Attendance Reports > Membership > SAT2200 - Membership Summary

This report lists the number of first day enrollments, year-to-date students, year-to-date withdrawals, and total membership for each grade level for the current year. The count of ineligible students (i.e., students with eligibility code 4 or 5, year-to-date students with eligibility code 0, and withdrawn students with eligibility code 0) is included.

A detail membership summary report is also produced that groups students by categories (first day enrollments, year-to-date students, etc.). The detail report shows membership information including active/inactive status, entry date, withdrawal date, and eligibility code. A grade level total is also displayed.

To view the detail report, click [Show Detail Report](#). To return to the summary report, click [Close Detail Report](#).

A duration report is one which lists counts of students who met criteria during a cycle, but did not necessarily meet that criteria during the same portion of a cycle. Compare this to snapshot reports like SAT0400 or SAT1000, which provide counts of students on the day being reported.
